“Exploring Ethics is better than other anthologies for several reasons; it offers a good combination of original/classic works and pieces that are summaries of views. It also stays at the introductory level and covers the topics that I teach. I rate this book a ‘10’ because of its selections and its price.”

INTRODUCTION TO PHILOSOPHY

This book is simply superb. It is clearly one of the best—if not the best—introductory philosophy texts available today. Its greatest strengths are its clarity, its commitment to conveying the relevance of philosophy, its logic excursus, and its comprehensiveness. Pojman was, and Vaughn is, a master at accessible, clear, engaging writing for introductory students. And the pedagogical features are superb.”

—Mark Piper, James Madison University

Praised for its unique combination of accessibility and comprehensiveness, Philosophy: The Quest for Truth, Tenth Edition, provides an excellent selection of ninety-four classical and contemporary readings—on twenty key problems in philosophy—carefully organized so that they present pro/con dialogues that allow students to compare and contrast the philosophers’ positions.

EXPLORING PHILOSOPHY
An Introductory Anthology
Fifth Edition
Edited by Steven M. Cahn, The City University of New York Graduate Center

"Exploring Philosophy is really fantastic because it takes the best of traditional philosophy and pairs it with modern, up-to-date philosophy. It has finally put women philosophers on an equal footing with the men. By using this book, an introductory course in philosophy can now reflect the contributions of women philosophers!"

—Clint Tibbs, Delta State University

Extensively revised and updated in its fifth edition, Exploring Philosophy is a uniquely accessible and engaging introduction to philosophy. Steven M. Cahn brings together exceptionally clear recent essays by noted philosophers and supplements them with influential historical sources.

While most other widely used introductory philosophy anthologies contain fewer than five articles authored by women, this unique volume includes more than thirty, thus reflecting the major role of women in contemporary philosophy.

PHILOSOPHY

Traditional and Experimental Readings
Edited by Fritz Allhoff, Western Michigan University, Ron Mallon, Washington University in St. Louis, and Shaun Nichols, the University of Arizona

“This is a brilliant volume, unlike anything previously published. The classic readings frame philosophy’s deepest and most persistent questions. The cutting-edge scientific readings offer new answers and introduce the methods that are transforming philosophy into a vibrant, interdisciplinary enterprise.”
—Joshua Greene, Harvard University

Featuring coverage that is equal parts historical, contemporary, and empirical/experimental, this topically organized reader provides students with a unique introduction to both the core and the vanguard of philosophy.

The text is enhanced by pedagogical tools including commentary on each reading and chapter, study questions, suggested further readings, and a glossary.

INTRODUCTION TO PHILOSOPHY

HISTORICALLY ORGANIZED TEXTS WITH READINGS

This historically organized introduction treats philosophy as a dramatic and continuous story—a Great Conversation

THE GREAT CONVERSATION
A Historical Introduction to Philosophy
Seventh Edition
Norman Melchert, Lehigh University

“This is certainly one of the best introductory texts on the market, possibly the best. For students who will take only one course in philosophy, this is the book that I would recommend; it will give them an excellent overview of more than two thousand years of philosophical debate.”

—Michael Henry, St. John’s University

Tracing the exchange of ideas between history’s key philosophers, The Great Conversation: A Historical Introduction to Philosophy, Seventh Edition, demonstrates that while constructing an argument or making a claim, one philosopher almost always has others in mind. It addresses the fundamental questions of human life: Who are we? What can we know? How should we live? and What sort of reality do we inhabit?

Author Norman Melchert provides a generous selection of excerpts from major philosophical works and makes them more easily understandable to students with his lucid and engaging explanations. Extensive cross-referencing shows students how philosophers respond appreciatively or critically to the thoughts of other philosophers.

**PHILOSOPHICAL DILEMMAS**

A Pro and Con Introduction to the Major Questions and Philosophers

Fourth Edition

Phil Washburn, New York University

“Washburn’s style is clear, concise, engaging, and fair. He is able to defend both pro and con positions so well that you cannot judge a bias or personal preference. This is commendable, since both sides are argued passionately and accurately. I have found no comparable or superior text.”

—William Rodriguez, Bethune Cookman University

Philosophical Dilemmas, Fourth Edition, outlines the classic arguments made by philosophers through the ages. It features sixty-three brief topical essays by author Phil Washburn organized around thirty-one fundamental philosophical questions. Each essay takes a definite stand and promotes it vigorously, creating a sharp contrast between the two positions and giving each abstract theory a more personal and believable “voice.” The text is enhanced by numerous pedagogical features including an introduction to each issue, key terms, chapter summaries, study questions, chronologies, a glossary, and an appendix on how to write an essay.

**SUPPLEMENT**

A Companion Website at www.oup.com/us/washburn offers a wealth of additional tools, including online sources and self-test questions for students. Instructor resources include introductions to the issues; summaries of the topical essays; summary points, PowerPoint-based slides, and test questions for the historical essays; answers to the critical questions that follow each essay; test questions on the topical essays; suggestions for class discussions; and a list of online resources.

A DIALOGUE ON FREE WILL AND SCIENCE
Alfred R. Mele, Florida State University

“The most engaging introduction to scientific challenges to free will that I have seen.”
—Benjamin McMyler, Texas A&M University

In this concise volume, renowned philosopher Alfred Mele explores the experiments in neuroscience and psychology that have been said to pose the greatest challenges to free will, encouraging students to form their own opinions on the validity and strength of these challenges.

He uses an imagined dialogue among several characters to make what is typically a complex topic more accessible and engaging for students. Guided by the question “How much power do these scientific challenges have?”, the characters first consider what having free will means and then react to well-known experiments that question its existence. Their discussions show how useful philosophical methods can be in assessing and interpreting scientific findings, thereby revealing certain weaknesses in these scientific challenges.

INTRODUCING ETHICS
A Critical Thinking Approach with Readings
Edited by Justin McBrayer, Fort Lewis College, and Peter J. Markie, University of Missouri, Columbia

“[The editors have successfully put all the tools of a successful philosopher in one place; they provide a logically progressive introduction that illuminates why philosophers analyze the way that we do.]”
—Daniel Deen, Florida State University

Introducing Ethics combines guiding commentary and questions with a rich selection of concise, carefully edited, and accessible readings on ethical theory and contemporary moral issues. This unique introduction shows students how to do philosophy by first analyzing texts—identifying ethical positions and the arguments that support them—and then evaluating the truth of those positions and the soundness of the arguments. In doing so, it provides students with a uniquely engaging introduction to ethics that also hones their critical thinking skills.

THE MORAL LIFE
An Introductory Reader in Ethics and Literature
Fifth Edition
Edited by Louis P. Pojman and Lewis Vaughn

“Ian incredible book. I would use no other. Students love it as much as I do.”
—Patricia Wheeler, Woodland Community College

Ideal for introductory ethics courses, *The Moral Life: An Introductory Reader in Ethics and Literature*, Fifth Edition, brings together an extensive and varied collection of ninety-one classical and contemporary readings on ethical theory and practice. Integrating literature with philosophy in an innovative way, this unique anthology uses literary works to enliven and make concrete the ethical theory or applied issues addressed. It also emphasizes the personal dimension of ethics, which is often ignored or minimized in ethics anthologies.

ETHICAL CHOICES
An Introduction to Moral Philosophy with Cases
Richard Burnor, Felician College, and Yvonne Raley

“Ethical choices are everywhere. Sometimes we are aware of the choices we must make. Other times we are not. Sometimes we are aware of the moral reasons underlying our choices. Other times we are not. And sometimes we act upon our best intentions and still make bad choices. This book is an excellent tool for helping students learn how to think about their ethical choices and the moral reasons underlying those choices.”

BIOETHICS
Principles, Issues, and Cases
Third Edition
Lewis Vaughn

Bioethics: Principles, Issues, and Cases, Third Edition, explores the philosophical, medical, social, and legal aspects of key bioethical issues. Integrating eighty-nine readings—twelve of them new to this edition—numerous classic bioethical cases, and abundant pedagogical tools, this text addresses the most provocative and controversial topics in bioethics.

» “Classic Case Files” describe landmark cases that shaped the debate, while news-making “Cases for Evaluation” encourage students to form their own opinions
» Various text boxes: “In Depth” boxes contain additional material, illustrations, or analyses, much of it “ripped from the headlines”; “Fact File” boxes provide statistics on the social, medical, and scientific facets of a chapter’s topic; and “Legal Brief” boxes summarize important court rulings and the status of major legislation
» “Key Terms” are boldfaced and boxed off within the text and then defined in a glossary at the back of the book
» “Applying Major Theories” sections at the end of each chapter help students relate theories to the issues

CONTEMPORARY BIOETHICS

A Reader with Cases
Edited by Jessica Pierce and George Randels, University of the Pacific

Incorporating introductions, readings, and cases that span the breadth of the discipline, Contemporary Bioethics: A Reader with Cases captures the spirit of bioethics as a rich, exciting, and continuously evolving field. Addressing all of the essential topics, it also moves beyond the “classic” approach of other books by extending into timely and provocative issues like terrorism, cosmetic surgery, immigration, genetic manipulations, links between first- and third-world health, and—unique to this book—environmental sustainability and climate change.

THINK WITH SOCRATES
An Introduction to Critical Thinking
Paul Herrick, Shoreline Community College

“A philosophical introduction to critical thinking built around the methods, ideas, and life of Socrates

Applying critical thinking to the Internet, mass media, advertising, personal experience, expert authority, the evaluation of sources, writing argumentative essays, and forming a worldview, this text resonates with today’s students and teaches them how to apply critical thinking in the real world. At the same time, it covers the ancient intellectual roots and history of the field, placing critical thinking in its larger context to help students appreciate its perennial value. Author Paul Herrick incorporates original sources from newspapers, a variety of media, and philosophical writing, along with engaging “interludes” featuring selections from Plato's dialogues.

Brief yet comprehensive, Think with Socrates uses the methods, ideas, and life of Socrates as a model for critical thinking. It offers a more philosophical, historical, and accessible introduction than longer textbooks while still addressing all of the key topics in logic and argumentation.

Critical Thinking, Second Edition, provides a non-technical vocabulary and analytic apparatus that guide students in identifying and articulating the central patterns found in reasoning and in expository writing more generally. The text is enhanced by hundreds of exercises throughout and worked-out solutions and additional exercises (without solutions) at the end of each chapter.

“This is the best critical thinking book on the market. Its strengths are its originality, thoughtfulness, attention to scholarship in informal logic/critical thinking, focus on the importance of critical reading skills, and practical application to the kinds of reasoning we do every day through a remarkably careful discussion of inference to the best explanation.”

—Dale Turner, Cal Poly Pomona

INTRODUCTION TO LOGIC
Paul Herrick, Shoreline Community College

“The greatest virtue of Herrick’s text is its accessibility. Still more unique, and of arguably equal value, is the placing of significant concepts in a historical context. The lower price of this text is also a HUGE selling point in its favor.”
—Andrew V. Jeffery, Green River Community College and Pierce College

With clear explanations and many contemporary examples drawn from popular culture and everyday life, author Paul Herrick untangles the complexities of logical theory in Introduction to Logic. Offering a unique combination of two approaches—the historical and the technical—he presents logic as both a fascinating, evolving story and a body of essential technical information with applications to every area of human thought.

**EXPLORING PHILOSOPHY OF RELIGION**

An Introductory Anthology
Second Edition
Edited by Steven M. Cahn, The City of New York Graduate Center

“Exploring Philosophy of Religion is a rich cornucopia of Western religious topics, traditions, and issues, both past and present. With an unusually high percentage of women contributors and thoughtful study questions, it is an outstanding text for use in introductory religion courses.”

—Sallie McFague, Vanderbilt University

In this remarkably accessible, concise, and engaging introduction to the philosophy of religion, Steven M. Cahn brings together a rich and balanced collection of sixty-six classic and contemporary readings. This unique anthology features a clear, well-organized structure and careful editing of many articles in order to sharpen their focus and make them understandable to students with little or no background in philosophy. The book also reflects the importance of women’s contributions to the field; approximately 40% of the contemporary readings are by women. In addition, topics often minimized in other collections are covered in more depth here, including forgiveness and love; ritual, prayer, and worship; gender; speaking of God; and the afterlife.

POLITICAL PHILOSOPHY ★ PHILOSOPHY, POLITICS, & ECONOMICS

The first comprehensive anthology of classical and contemporary readings in Philosophy, Politics, and Economics

PHILOSOPHY, POLITICS, AND ECONOMICS
An Anthology
Jonathan Anomaly, Duke-UNC, Geoffrey Brennan, Duke University, UNC Chapel Hill, and Australian National University, Michael C. Munger, Duke University, and Geoffrey Sayre-McCord, UNC Chapel Hill

“This book is an exceptionally well-developed and well-conceived anthology. It offers wide coverage, contains both foundational and applied articles, and includes more technical and more ‘fun’ work. It’s something that an instructor could use in introductory and also advanced courses.”

—Jason Brennan, Georgetown University

The only book on the market to include classical and contemporary readings from key authors in Philosophy, Politics, and Economics (PPE), this unique anthology provides a comprehensive overview of the central topics in this rapidly expanding field. Each chapter opens with an introduction that helps students understand the central arguments and key concepts in the readings. The selections encourage students to think about the extent to which the three disciplines offer complementary or contradictory ways of approaching the relevant issues. Philosophy, Politics, and Economics: An Anthology is ideal for undergraduate PPE programs and courses in political philosophy and political economy.

**PHILOSOPHY OF SCIENCE**

*A New Introduction*

Gillian Barker, Western University, and Philip Kitcher, Columbia University

“A lucid, wide-ranging, and accessible introduction to the current state of philosophical discussion about the natural sciences and their place in society.”

—Justin B. Biddle, Georgia Institute of Technology

*Philosophy of Science: A New Introduction* shows how to think philosophically about science and why it is essential and fascinating to do so. Gillian Barker and Philip Kitcher reconsider the core questions in philosophy of science in light of new developments in the field, in history and sociology of science, and in the sciences themselves. They explore how philosophical questions are linked to current debates about issues like climate change, science and religion, race, intellectual property rights, and medical research priorities, showing how these questions—and philosophers’ attempts to answer them—matter in the real world.

RIDDLES OF EXISTENCE
A Guided Tour of Metaphysics
Second Edition
Earl I. Conee, University of Rochester, and Theodore Sider, Rutgers University

Now in its second edition, Riddles of Existence is the first book to make metaphysics genuinely accessible and fun. Its lively, informal style brings metaphysical questions to life and shows how stimulating it can be to think about them.

Earl Conee and Theodore Sider offer a lucid discussion of the major topics in metaphysics. What makes me the same person I was as a child? Is everything fated to be exactly as it is? Does time flow? How fast does it flow, and can one travel back in time, against the current? Does God exist? Why is there anything at all rather than nothing? The authors approach these topics in an open-minded and non-dogmatic manner, giving students a full sense of the issues involved.
