Before the Fires
An Oral History of African American Life in the Bronx from the 1930s to the 1960s
Mark Naison, Fordham University, and Bob Gumbs, Graphic Designer

• Represents the
intense and
decades-long work of the Bronx African
American History Project, spearheaded by
Mark Naison in 2002
• Counters the negative narrative conveyed by
the media of the Bronx’s past consisting of a
hellish fire-ridden borough overcome with
drugs, crime, violence, and family decay.
• Full of vivid personal stories from actors
to educators to musicians recounting their
childhoods, the sometimes harrowing
personal obstacles they faced, and the
support and solace they drew from their
Bronx environments

Before the Fires provides an oral history of African
Americans in the South Bronx who grew up in a
cohesive, nurturing community—not the familiar
narrative of gangs, drugs, violence, and family
decay. The interviewees have been trying to tell
their story for 30 years, but no one would listen
until Mark Naison’s oral history project began
welcoming their voices.

Lebron lays out the genesis of the ideas that have built the movement, presenting a foundational blueprint of sorts that can help us make sense of the emotions, demands, and arguments of present-day activists and public thinkers as well as recast the role of historical black thinkers in American life.

The Smell of Battle, the Taste of Siege
A Sensory History of the Civil War
Mark M. Smith, University of South Carolina

Reasserting America in the 1970s
U.S. Public Diplomacy and the Rebuilding of America’s Image Abroad
Edited by Hallvard Notaker, University of Oslo, Giles Scott-Smith, Leiden University, and David J. Snyder, University of South Carolina
Reasserting America in the 1970s brings together two areas of burgeoning scholarly interest. On the one hand, scholars are investigating the many ways in which the 1970s constituted a profound era of transition in the international order. The American defeat in Vietnam, the breakdown of the Bretton Woods exchange system and a string of domestic setbacks including Watergate, Three-Mile Island and reversals during the Carter years and a string of domestic setbacks including Watergate, the breakdown of the Bretton Woods exchange system, and popular culture.

The Shock of America
An ambitious, original book describing a century of Europe coping with America: its inventions, personalities, films, armies, business, and politics. These decades reveal how much emotional energy Europeans invested in finding their own ways to reconcile tradition and modernity under the pressure of the ever-evolving American challenge.

Mission Failure
America and the World in the Post-Cold War Era
Michael Mandelbaum, Johns Hopkins-SAIS
In Mission Failure, Mandelbaum argues that, in the past 25 years, U.S. foreign policy has undergone a significant shift. Historically, U.S. foreign policy was centered primarily on threat reduction, but the U.S. military has turned in recent years to missions that are largely humanitarian and socio-political.

Legalist Empire
International Law and American Foreign Relations in the Early Twentieth Century
Benjamin Allen Coates, Wake Forest University
This book restores the role of lawyers to the operation of American foreign relations and international law and the making of American empire from the Philippines through the eve of World War II.

Hearts, Minds, Voices
US Cold War Public Diplomacy and the Formation of the Third World
Jason C. Parker, Texas A&M University
For over four decades, the Cold War superpowers endeavored mightily to ‘win hearts and minds’ abroad through public diplomacy.
In 1989, U.S. Secretary of State John Hay called for world powers to take an ‘Open Door’ approach to relations with China to guarantee equal trading opportunities and prevent conflict in the region. That idea emerged as the central component of U.S. foreign policy in the twentieth century in much the same way as the Monroe Doctrine and Manifest Destiny shaped thinking in the nineteenth century. A flexible idea, the Open Door was used by presidential administrations to inspire Americans to fight against totalitarianism, imperialism, and international communism. In a concise yet wide-ranging examination of its origins and development, readers will discover how the idea of the ‘Open Door’ approach to relations with China came to define the American Century.

The Big Muddy

Christopher Morris, University of Texas at Arlington

• First long-term environmental history of the Lower Mississippi Valley
• Timed to publish on the anniversary of Hurricane Katrina
• Puts a U.S. region into a global context, comparing it with other similar environments, from West Africa to the Netherlands to Bangladesh

The Mississippi Valley has been a place where the battle between water and land has been a constant for centuries. It has shaped the relationship between its inhabitants and their environment long before Hurricane Katrina, though of course these events have put the topic in the headlines and made this the preeminent issue shaping the region today. In this work, Christopher Morris takes a long view of the interaction between people and the wet landscape of the Mississippi Valley from pre-contact hunter-gatherer bands to present-day industrial and post-industrial society.

In this critical study of a phenomenon, the man and the political mythology of John Birch—both near-legendary status, Lautz cuts through the mythology. Perhaps the truest test of any political figure who has reached this privileged relationship is critical to understanding the current state of American politics. Today, politics is big business. Edited by Jeffrey A. Engel, Southern Methodist University
Franklin D. Roosevelt’s Four Freedoms address was more than a great speech. The way FDR framed what Americans fought for during World War II—specifically for freedom of speech, freedom from want, freedom of religion and freedom from fear—and the way our understanding of those freedoms has evolved over time, helped define how Americans conceived of themselves from the 1940s to our present day.

Religious Lessons
Catholic Sisters and the Captured Schools Crisis in New Mexico
Kathleen Holtscher, Villanova University
Religious Lessons tells the story of Zellers v. Huff, which challenged Catholic religious employment in public schools in 1948. The ‘Dixon case,’ as it was known nationally, was the most famous in a series of midcentury lawsuits, all targeting what opponents provocatively dubbed ‘captive schools.’ Spearheaded by Protestants and Other Americans United for Separation of Church and State, the publicity campaign built around Zellers drew on centuries-old rhetoric of Catholic captivity to remind Americans about the threat of Catholic power in the post-War era, and the danger Catholic sisters dressed in full habits posed to American education.

Drawing on some of the founders’ most familiar rhetoric of the founding era, Dreisbach shows that the Bible was the most frequently referenced book in the political discourse of American national identity and the birth of popular Protestantism in the U.S. Shows how certain predominant and enduring features of American political culture are best understood as a form of religious nationalism by identifying a historic flight within Anglo-American Protestantism, and how it related to major contemporary political developments in the early American republic. Sam Haselby explains the origins of the distinct language and means of combining political and religious authority that characterizes American nationalism.

Heathen, Hindoo, Hindu
American Representations of India, 1721–1893
Michael J. Altman, University of Alabama

Heathen, Hindoo, Hindu is a groundbreaking analysis of American representations of religion in India before the turn of the twentieth century. Before Americans wrote about ‘Hinduism’, they wrote about ‘heathenism’, ‘the religion of the Hindoos’, and ‘Brahmanism’. Americans used the heathen, Hindoo, and Hindu as an other against which they represented themselves. The questions of American identity, classification, representation and the definition of ‘religion’ that animated descriptions of heathens, Hindoos, and Hindus in the past still animate American debates today.

Standing Their Ground
Small Farmers in North Carolina since the Civil War
Adrienne Montelith Pettry, City College of New York
This book explores a local iteration of a profound human experience: the transformation of agriculture. Focusing on small farm owners in North Carolina from the post-Civil War era to the post-Civil Rights era, it argues that they resisted changes to farming that did not square with their agrarian ideology. However, the antidemocratic character of the Jim Crow South weakened their resistance.

The American President

William E. Leuchtenburg, University of North Carolina, Chapel Hill

The American President is a riveting account of the actions of American presidents in the twentieth century from the assassination of McKinley in 1901 to Clinton’s last night in office in 2001.

Defenders of the Unborn

The Pro-Life Movement before Roe v. Wade

Many people are shocked upon discovering that tens of thousands of innocent persons in the United States were involuntarily sterilized, forced into institutions, and otherwise maltreated within the course of the eugenic movement (1900–39). Such social control efforts are easier to understand when we consider the variety of dehumanizing and fear-inducing rhetoric propagandists invoke to frame their potential victims. This book details the major rhetorical themes employed within the context of eugenic propaganda, drawing largely on original sources of the period.

Early in the twentieth century the term ‘moran’ was developed to describe the primary targets of eugenic control.

Escape to Miami
An Oral History of the Cuban Rafters Crisis
Elizabeth Campisi, University at Albany, SUNY
The book contains the only English language, first-person accounts of the entire rafer crisis and narratives of incidents in the camps that have not been widely disclosed before.
The book provides new information on the way the Cuban camps were internally organized and the social environment in the camps, including creative expression.
It uses trauma theory to explain the reasons for the ubiquity of the artwork as well as some of its content, which is a unique feature of this oral history.
Escape to Miami is an oral history of the experience of detainees from Guantanamo during the 1994-1996 Cuban Rafer Crisis. Through life history interviews, the book offers the gripping stories of twelve rafters while also providing a study of group-level trauma and coping. Though important as an oral history, the examination of camp culture makes the project an innovative contribution to the field of anthropology as Campisi argues that coping with trauma experiences as a group can create new cultural forms.

The Long Reach of the Sixties
1961-1964: The Making of the American Century
Laura Kalman, UC-Santa Barbara

• Argues that the divisive contemporary Supreme Court confirmation process is rooted in the late 1960s and early 1970s, and not in the Bork nomination as is often assumed
• Highly entertaining – and salty – stories of political battles involving LBJ and Nixon fuel the narrative
• Demonstrates in vivid prose how the tumultuous politics events of the 1960s have influenced the way in which presidents have selected justices ever since

In The Long Reach of the Sixties, legal historian Laura Kalman explores the Supreme Court nomination and confirmation battles of the late 1960s and early 1970s and shows how they have haunted – indeed, scarred – the Supreme Court appointments process ever since.

The Transatlantic Kindergarten
Ann Taylor Allen, University of Louisville

- The first genuinely transnational study of kindergarten that takes into account many kinds of contacts across national borders
- Shows how the kindergarten, originally based on an international idea of childhood and its needs, adapted to two very different societies
- Highlights the importance of women for the history of education, showing that women of the nineteenth century connected the struggle for women’s rights to many other social-reform initiatives, of which the kindergarten movement was one

The kindergarten, which offered an innovative approach to early childhood education, was invented in the German-speaking world and arrived in the United States along with German political exiles in the 1850s. In both the United States and Germany, activist women worked to develop and promote this new form of education. Over the course of three generations they created one of the most successful transnational women’s movements of the nineteenth century. In this book, Ann Taylor Allen presents the first transnational history of the kindergarten as it developed in both Germany and America between 1840 and 1919.

Over the last fifteen years, undergraduate U.S. history courses have made great progress in incorporating primary sources and diverse voices into the survey. However, teachers still struggle to find professional writing by working historians in a format useful to undergraduates. Also, in 2014, the College Board redesigned the AP U.S. History curriculum and assessments to require students to demonstrate a critical approach to historical writing by professional historians. These facts have increased the demand among teachers for access to high-quality secondary material by professional historians in a single, convenient publication.

Original Intents
Hamilton, Jefferson, Madison, and the American Founding
Andrew Shankman, Rutgers University

Lucid and concise, Original Intents: Hamilton, Jefferson, Madison, and the American Founding fully explains the political, economic, and constitutional ideas of Alexander Hamilton, Thomas Jefferson, and James Madison as their thinking developed from the American Revolution through the early 1790s. It shows how their ideas took shape and changed as they engaged with each other and eventually began to have serious debates and arguments. Original Intents shows that there was no single original meaning or intent in the Constitution, and that Hamilton sought to build a Republican United States that was completely incompatible with the Republic that Jefferson and Madison wanted. By the early 1790s, the two Virginians had come to despise Hamilton and detest his vision, and vice versa.
