Welcome

Welcome to our science textbooks catalogue for 2020.

In these pages you’ll find details of our recently published and upcoming textbooks in the biosciences, chemistry, engineering, geography, pharmacy, and psychology.

This catalogue also includes titles from Sinauer Associates, an imprint of Oxford University Press. You’ll find these in the biosciences and psychology sections of the catalogue, within the relevant subject area.

Have you ever considered writing a textbook? Want to know what’s involved once your manuscript has been submitted? See our brief guide to the OUP publishing process on pages 14 and 15.

For more detailed information about any of the titles or initiatives mentioned here, as well as our full backlist of titles, visit our website.

THE OUP PUBLISHING PROCESS

A lot of work goes into creating a textbook
These nine steps outline the process of publishing a textbook, from the original idea, to printing.

1. Publisher identifies a need in a market and contacts appropriate authors.

2. Authors and publisher write a proposal which is sent out to review and edited according to market feedback.

6. The cover and the text design are briefed, concepts are shortlisted, and a final cover is decided.

7. After many rounds of edits, the final manuscript is submitted.

8. Your editor then sends your manuscript to the production department who arrange the copyediting and typesetting.
3 The final proposal is taken to the editorial board and the OUP delegates for approval.

4 Authors begin writing and chapters are submitted over the course of 2-4 years.

5 During the writing process, draft chapters are sent to academics, practitioners, and students for review and multiple rounds of edits begin.

9 The final files are sent to the printers for printing and the book is complete!

Looking beyond the book

Most of our textbooks publish with accompanying online resources. The resources are closely linked to the textbook written by (or in conjunction with) the author.

Designed to enhance the learning experience and save you time, these materials enable students to:

- get more from their textbooks
- continue learning outside their timetabled teaching
- interact more deeply with the subject

Published in partnership with the Royal Society of Biology, Oxford Biology Primers encourage students to explore biology for themselves.

They are the only resource to introduce prospective and current students of undergraduate-level bioscience to a range of topics from this dynamic experimental science, enticning them to study further.

Oxford University Press has a team of dedicated campus representatives who visit institutions across the UK, Europe, and the Middle East.

The team are committed to providing a high level of service and support. In fact, we don’t believe you’ll receive a better level of ongoing support from any other publisher.

Your local campus representative will:

- Consult with you to establish your requirements
- Provide relevant materials in the format that works best for you
- Ensure you have access to our online resources and feel comfortable using them
- Offer live demonstrations of resources to your colleagues or students, at your invitation
- Package textbooks together to ensure the best value for your students and department
- Work with your local bookshop to get books to your students on time

Contact your local representative at any time and find out for yourself how they can help you deliver your teaching.

Find out who to contact for your institution at www.oup.com/ukhe/find-your-rep.
