Ageing
A Very Short Introduction
Nancy A. Pachana
Ageing entails lifelong dynamic changes in biological, psychological, and social functioning. While such changes in later adulthood were somewhat neglected by scientists in the past, recent decades have seen a marked increase in research in this area. Nancy A. Pachana examines the impact of rising numbers of older people worldwide.

**Women’s Neurology**  
Edited by Mary Angela O’Neal  
Part of the ‘What Do I Do Now?’ series, *Women’s Neurology* uses a case-based approach to cover common and important topics in the examination, investigation, and management of neurologic disorders in women. Each chapter provides a discussion of the diagnosis, key points to remember, and selected references for further reading. The book addresses a wide range of topics including reproductive health, pregnancy, and healthy aging. The volume is also a self-assessment tool that tests the reader’s ability to answer the question, ‘What do I do now?’

Navigating Life with Amyotrophic Lateral Sclerosis
Mark B. Bromberg and Diane Banks Bromberg
Navigating Life with Amyotrophic Lateral Sclerosis provides accessible, comprehensive, and up-to-date information about the challenges patients, family members, and caregivers face when confronted by ALS. This guide covers all aspects of managing ALS, from the onset of symptoms, diagnosis, treatments, and coping strategies, to the use of home health care or hospice, and new research in the field. The book also sheds light on difficult topics, such as end-of-life care and managing legal affairs. Formatted in a question-and-answer style, peppered throughout with patient stories, and with sections devoted to family members and caregivers, this compassionate resource provides guidance to those seeking to understand how to live with this disease. 

Navigating Life with Migraine and Other Headaches
William B. Young, and Stephen D. Silberstein
Navigating Life with Migraine and Other Headaches focuses on the many myths that exist around headaches and dispels common misperceptions by providing simple explanations on how headaches occur, and, most importantly, how to treat them. The authors give real, practical advice: when and how to manage your headaches, when to seek treatment, and when to be concerned. From vitamins to prescription meds; from when to go to the emergency department to optimizing doctor visits; options for managing headaches are presented in this accessible and easy-to-read resource.

Navigating Life with Epilepsy
David C Spencer
Navigating Life with Epilepsy aims to provide clear and reliable information about epilepsy, including ‘what’ (definition), ‘how’ (pathophysiology), ‘who’ (epidemiology), and ‘why’ (etiology).

Essentials of Hospital Neurology
Edited by Karl E. Misulis and E. Lee Murray
Essentials of Hospital Neurology is a concise and practical guide to the diagnosis and management of neurologic disorders commonly encountered in hospital practice. This book discusses the business of hospital neurology, problem-oriented approaches to diagnosis, clinical details of important neurologic disorders that may be seen in the ER and inpatient settings, and key diagnostic and management strategies. This text focuses on practical management, making this an excellent source for the neurologist at any level from the resident to fellow to practicing physician. Medicine hospitalists and hospital-based mid-level providers will find this a useful resource for guiding care of their patients with neurologic conditions.

Brain Death
THIRD EDITION
Elco F.M. Wijdicks
Brain Death, Third Edition introduces new research in the intensive care unit, newly unearthed historical data on important US-UK differences, a thorough discussion of US guidelines and how it is used in hospital practice, and compares guidelines used elsewhere in the world. In this incisive work, the many complexities of diagnosis and management of brain death are examined but it also illuminates cultural beliefs and bioethical problems, highlights the nature of conferences with family members, and captures several organ procurement issues. The book also includes 30 commonly asked practice problems to resolve diagnostic uncertainties and conflicts along with 12 video clips to assist in neurological evaluation.

Seven Steps to Managing Your Memory
What's Normal and What's Not
Andrew E. Budson and Maureen K. O'Connor

Seven Steps to Managing Your Memory is written in an easy-to-read and comprehensive style, featuring clinical vignettes and character-based stories that provide real-life examples of how to successfully manage age-related memory loss. Neurologist Andrew Budson and neuropsychologist Maureen O’Conner tackle the frequently-asked questions, showing what lapses in memory are normal and which need immediate medical attention, what kinds of alternative and pharmacological treatments can help, and strategies to keep the memory active as you age.

Alzheimer’s Disease and Dementia
What Everyone Needs to Know®
Steven R. Sabat

Alzheimer’s Disease and Dementia: What Everyone Needs to Know® provides information not only about these conditions, but, crucially, about the many psychological and social strengths possessed by people diagnosed. Identifying and using those strengths can improve the quality of life of all concerned in non-pharmacological ways. This book thoroughly informs readers of the clinical history of these conditions, their causes and treatments, and methods of caring for and communicating effectively with those with AD.

Niedermeyer’s Electroencephalography

Basic Principles, Clinical Applications, and Related Fields
SEVENTH EDITION
Edited by Donald L. Schomer and Fernando H. Lopes da Silva

Niedermeyer’s Electroencephalography: Basic Principles, Clinical Applications, and Related Fields, Seventh Edition keeps the neurophysiologist on the forefront of medical advancement. This authoritative text covers basic neurophysiology, neuroanatomy, and neuroimaging to provide a better understanding of clinical neurophysiological findings. This edition further delves into current state-of-the-art recording EEG activity both in the normal clinical environment and unique situations such as the intensive care unit, operating rooms, and epilepsy monitoring suites. As computer technology evolves, so does the integration of analytical methods that significantly affect the reader’s interpretations of waveforms and trends that are occurring on long-term monitoring sessions.

50 Imaging Studies Every Doctor Should Know
Edited by Christoph I. Lee
Series Edited by Michael E. Hochman
50 Imaging Studies Every Doctors Should Know presents summaries of key studies that have shaped the current clinical practice of radiology. Numerous topics are covered including: headache, back pain, chest pain, abdominal and pelvic pain, bone, joint, and extremity pain, cancer screening and management, and radiation exposure from medical imaging. An illustrative clinical case and radiologic image conclude each review followed by brief information on other relevant studies.

Toxic Cocktail
How Chemical Pollution Is Poisoning Our Brains
Barbara Demeneix
Children born to women exposed to thyroid-disrupting chemicals have lower IQs and more neurodevelopmental disorders in autism and ADHD, among others. Chemicals that contaminate our bodies and interfere with our thyroids are in fact lowering our IQ and increasing disorders for future generations. A ‘self-help’ guide to reducing exposure to chemicals is included.

Psychiatry Board Review
Edited by Rajesh Tampi, Kristina Zdanys, and Mark Oldham
The new review book is aimed primarily at psychiatrists preparing for their initial certification or recertification examinations in psychiatry. The textbook also provides a useful reference for all psychiatric clinicians in practice to familiarize themselves with the new diagnostic classifications of DSM-5, the latest psychopharmacologic treatment strategies and psychotherapeutic techniques.

Knowledge to Action

*Accelerating Progress in Health, Well-Being, and Equity*

Edited by Alonzo L. Plough

Assembled by the Robert Wood Johnson Foundation and featuring today’s most prominent voices from diverse sectors, *Knowledge to Action* is a collection of short conversations focused on the idea of meaningful change – its definition, its impediments, and exploring how we can transition from research to action in health, well-being, and equity. Steeped in honesty and benefiting from the diverse experiences of an extraordinary assembly of academics, journalists, policymakers, public health practitioners, and researchers, this book offers provocative yet actionable perspectives that will benefit anyone who reads it.

The Vaccine Handbook

A Practitioner's Guide to Maximizing Use and Efficacy across the Lifespan

Tina Q. Tan, John P. Flaherty, and Melvin V. Gerbie

The Vaccine Handbook is a one-stop resource for clinicians whose practices involve administering vaccines. At-a-glance immunization schedules, scripts for addressing patient concerns, and frequently asked questions at the end of each section prepare practitioners to meet challenges such as vaccine hesitancy, correct dosing, and the timing of 'catch-up' immunizations with confidence.

Next in Line

Lowered Care Expectations in the Age of Retail- and Value-Based Health

Timothy J. Hoff

Next In Line is the first book to examine the doctor-patient relationship in the context of its new environs, in particular the impact of efficiency-driven innovation and retail-care models on physician mindsets and the patient experience. The overall picture is one of lowered expectations – a transactional, impersonal, and institutionally-limited incarnation of the medical bedside that leaves all parties underwhelmed and overstressed.

*What Everyone Needs to Know*

Philip J. Landrigan and Mary M. Landrigan

*Children and Environmental Toxins: What Everyone Needs to Know* offers an authoritative yet accessible question-and-answer guide to the ‘silent spring’ of environmental threats to children’s health. As the burdens of environmental toxins and chronic disease continue to defy borders, this book will be an invaluable addition to the conspicuously sparse literature in this area.
