- Managing Your Mind
- manage your mind
Oxford Clinical Psychology is an online resource providing full-text access to Oxford's clinical psychology book list. Covering a wide range of specialty areas, disorders, and treatment modalities, Oxford Clinical Psychology offers reliable access to guidance from a superlative group of experienced authors and editors. With intelligent search and browse options, and the ability to annotate, download, and print chapters, this essential resource provides one place for fast access to high-quality clinical psychology works.

We are proud to make the below renowned series' available via Oxford Clinical Psychology:

- **Treatments That Work**: a series of Therapists Guides and Workbooks which communicate evidence-based interventions to provide clinicians with the information they need to provide the best possible client care
- **The Collected Works of D.W. Winnicott**: the writings from one of the most innovative thinkers within the field of psychoanalysis and child development: Donald Woods Winnicott

Oxford Scholarship Online (OSO) is a vast and rapidly expanding cross-searchable library which offers quick and easy access to thousands of OUP books. OSO features titles from our renowned and best-selling Oxford Psychology Series, plus other outstanding titles in the core areas of cognitive research.

Editor in Chief: Dana S. Dunn

Developed cooperatively with scholars worldwide, Oxford Bibliographies in Psychology offers exclusive, authoritative research guides. Combining the best features of an annotated bibliography and a high-level encyclopedia, this cutting-edge resource points researchers to the best available scholarship across the field of Psychology.

Delivering the best scholarly publishing from leading university presses around the world

University Press Scholarship Online (UPSO) brings together the best scholarly publishing from some of the most celebrated university presses across the globe, all available on a single online platform. The UPSO Psychology list features titles from the renowned and best-selling Oxford Psychology Series, plus other outstanding titles from our authoritative partners including Columbia University Press, NYU Press, The MIT Press, and Yale University Press.

Clinical Psychology

A Very Short Introduction

Susan Llewelyn

University of Oxford, and

Katie Aafjes-van Doorn

Access Institute for Psychological Services, San Francisco

Clinical psychology treats people who are facing difficulties or changes in their lives. Approaching personal distress as an unhappy outcome of certain ways of thinking, behaving and relating, practitioners work with people to try and help them change what is distressing or concerning them.

Very Short Introductions

UK: Apr 2017 / US: Apr 2018

The Collected Works of D. W. Winnicott

12-Volume Set

Edited by Lesley Caldwell

University College, London, and

Helen Taylor Robinson

Institute of Psychoanalysis, London

- Brings together for the first time a chronological collection of Winnicott’s work
- Includes previously unpublished archival material, letters, reviews, obituaries, drawings, and comments and discussions on political and psychoanalytic matters
- Includes online access to select audio recordings of Winnicott’s radio broadcasts

Now, for the first time, virtually all of Winnicott’s writings are presented chronologically in 12 volumes, edited and annotated by leading Winnicott scholars.

Case Studies Within Psychotherapy Trials

Integrating Qualitative and Quantitative Methods

Edited by Daniel B. Fishman

Stanley B. Messer, both at Rutgers University, David J.A. Edwards

Rhodes University, South Africa, and

Frank M. Dattilio

Harvard Medical School

In recent years, emerging research methods favor bridging and integrating qualitative and quantitative perspectives, yielding a promising synergy between them. Case Studies within Psychotherapy Trials furthers this synergy, rooted in the understanding that researchers and practitioners share the goal of increasing the capacity of psychotherapy to help clients.

Proscription, Well-being, and Mental Health

Andrew MacLeod

Royal Holloway, London

This book reviews the growing evidence for the link between prospection and well-being. A variety of aspects of prospection are discussed, including prediction and anticipation for future events, judging how we will feel when events do happen to us, and how we feel in the here-and-now when contemplating what will happen in the future.

Disability-Affirmative Therapy

**A Case Formulation Template for Clients with Disabilities**

Edited by Rhoda Olkin, California School of Professional Psychology, San Francisco

Disability-Affirmative Therapy (D-AT) helps clinicians put the disability of a client into proper focus, without making one of the usual mistakes associated with cross-cultural therapy: overinflating the role of the disability, or underestimating its profound effects. D-AT provides a template for evaluation – nine areas to be discussed with the client – that allows understanding of the client’s lifetime experiences with disability.

Bouncing Back

**Skills for Adaptation to Injury, Aging, Illness, and Pain**

Richard Wanlass, Healthcare Professional

- Presents practical skills for improving mood, managing stress and anxiety, controlling anger and frustration, getting along with others, managing memory problems, and coping with chronic pain
- Includes reflective worksheets with space for writing within the book

The book presents clear instructions on coping with changes in functioning associated with injury, aging, illness, and pain. Chapters teach how to restore mood and self-esteem, manage stress and frustration, maintain strong social ties, cope with chronic pain, function efficiently when memory ability declines, and master self-motivation and time management.

New Edition

**On Being a Therapist**

FIFTH EDITION

Jeffrey A. Kottler, California State University - Fullerton

- Delves into the inner world of a therapist’s hopes and fears
- Written by Jeffrey Kottler, often considered the ’conscience of the profession’ for his willingness to be so honest, authentic, and courageous

On Being a Therapist, Fifth Edition continues to explore many of the challenges that therapists face in their practices today, although it expands from previous editions in that it features new research and clinical experience, shares new stories, and adds material centered on technology.

Assessment and Intervention with Children and Adolescents Who Misuse Fire
Practitioner Guide
David J. Kolko, University of Pittsburgh School of Medicine, and Eric M. Vernberg, University of Kansas
Assessment and Intervention with Children and Adolescents Who Misuse Fire presents practical guidelines to facilitate the clinical assessment and treatment of youth firesetting. Based on nearly four decades of research and intervention experience, the treatment is directed toward reducing any inappropriate involvement in fire or related activities in order to lower the risk for property damage, personal injury, and other adverse consequences associated with these behaviors.

Unified Protocols for Transdiagnostic Treatment of Emotional Disorders in Children and Adolescents
Therapist Guide
Jill Ehrenreich-May, University of Miami, Sarah M. Kennedy, Children’s Hospital Colorado, Jamie A. Sherman, University of Miami, Emily L. Bilek, University of Michigan, Brian A. Buzzella, VA San Diego’s Family Mental Health Program, Shannon M. Bennett, Weil Cornell Medicine, and David H. Barlow, Boston University
• Features a transdiagnostic model for working with children and adolescents with emotional disorders
• Easy-to-follow, session-by-session organization
• Applicable to a wide group of child and adolescent clients seen in typical practice

The Unified Protocols for Transdiagnostic Treatment of Emotional Disorders in Children and Adolescents suggest that there may be a simple and efficient method of utilizing effective treatment strategies, such as those commonly included in CBT, in a manner that addresses the broad array of emotional disorder symptoms in children and adolescents. The Unified Protocol for children and adolescents comprises a Therapist Guide, as well as two Workbooks, one for children, and one for adolescents.

Applications of the Unified Protocol for Transdiagnostic Treatment of Emotional Disorders
Edited by David H. Barlow, Center for Anxiety and Related Disorders, Boston University, and Todd J. Farberone, Boston University
• Illustrates how the UP can effectively be applied across a broad range of clinical diagnoses and cases
• Each chapter presents a case and provides research supporting transdiagnostic processes as it relates to the specific disorder
• Most chapters are authored by current or former UP team members, and they write about cases they themselves have treated

Applications of the Unified Protocol for Transdiagnostic Treatment of Emotional Disorders provides clinicians with a ‘how to’ guide for using the UP to treat a broad range of commonly encountered psychological disorders in adults.

Madness and Modernism
Insanity In The Light Of Modern Art, Literature, And Thought
Louis Sass, Rutgers University, USA

Madness and Modernism provides a phenomenological study of schizophrenic disorders, criticizing some standard conceptions of these disorders. Sass argues that many aspects of this group of disorders can actually involve more sophisticated (albeit dysfunctional) forms of mind and experience.

International Perspectives in Philosophy and Psychiatry

Adaptive Mentalization-Based Integrative Treatment
A Guide for Teams to Develop Systems of Care
Dickon Bevington, Anna Freud National Centre for Children and Families, and Cambrigeshire and Peterborough Mental Health (NHS) Foundation Trust, Peter Fuggle, Anna Freud National Centre for Children and Families, Liz Cracknell, and Peter Fonagy, University College London

This book describes Adaptive Mentalization-Based Integrative Treatment (AMBIT). This is an approach to working with people – particularly young people and young adults – whose problems are not limited to one domain. AMBIT has been designed for community teams from Mental Health, Social Care, and Youth work.

If Your Adolescent Has ADHD
An Essential Resource for Parents
Dr. Thomas J. Power,
University of Pennsylvania and the Center for Management of ADHD at the Children’s Hospital of Philadelphia (CHOP), and Linda Wamser Andrews

- Offers reliable, up-to-date information on adolescent ADHD, including causes, symptoms, diagnosis, and treatment
- Provides practical, evidence-based advice from a leading psychologist on dealing with common issues, such as determining readiness to drive and instilling good homework and study habits
- Covers teen-specific topics such as adolescent friendships, dating, curfews, and sports and extracurricular activities—many of which receive short shrift in other books for parents

If Your Adolescent Has ADHD: An Essential Resource for Parents provides the up-to-date information and down-to-earth support that parents need. The book is an authoritative guide to teen ADHD, including symptoms, diagnosis, treatment, school interventions, and parenting strategies. It addresses common concerns, such as driving, curfews, extracurricular activities, and homework.

Adolescent Mental Health Initiative

NEW EDITION
Treating and Preventing Adolescent Mental Health Disorders
What We Know and What We Don’t Know
Edited by Dwight L. Evans, Edna B. Foa, Raquel E. Gur, Charles P. O’Brien, Daniel Romer, Martin E.P. Seligman, all at University of Pennsylvania; Herbert Hendin, Suicide Prevention initiatives, and by B. Timothy Walsh, Columbia University Medical Center

- First edition received 2005 Award for Excellence in Clinical Medicine from the Division of Professional/Scholarly Publishing of the Association of American Publishers
- Both treatment and prevention approaches are highlighted with the latest information about the diffusion of evidence based practices
- Includes the latest information about behavioral impulse control disorders that emerge in adolescence, such as problem gambling and internet use

This volume reviews the latest information about the treatment and prevention of major mental disorders that emerge during adolescence. It should be a primary resource for both clinicians and researchers, with special attention to gaps in our knowledge.

Adolescent Mental Health Initiative

Mindlessness
The Corruption of Mindfulness in a Culture of Narcissism
Thomas Joiner
Florida State University

- Chronicles the promising rise of mindfulness, then its troubling perversion in many sectors of society
- Gives mindfulness its full due as a useful philosophical vantage point, while examining how trends toward narcissism have corrupted the movement
- Ponders what, if anything, can be salvaged from the original, useful concept of mindfulness

Thomas Joiner’s Mindlessness chronicles the promising rise of mindfulness and its perhaps inevitable degradation. Giving mindfulness its full due, both as a useful philosophical vantage point and as a means to address various life challenges, Joiner mercilessly charts how narcissism has intertwined with and co-opted the practice to create a Frankenstein’s monster of cultural solipsism and self-importance.

The Power of Positive Parenting
Transforming the Lives of Children, Parents, and Communities Using the Triple P System
Edited by Matthew R. Sanders, University of Queensland, and Trevor G. Mazzucchelli, Curtin University

The Power of Positive Parenting provides an in-depth description of ‘Triple P’, one of the most extensively studied parenting programs in the world, backed by more than 30 years of ongoing research. Triple P has its origins in social learning theory and the principles of behavior, cognitive, and affective change, and its aim is to prevent severe behavioral, emotional, and developmental problems in children and adolescents by enhancing the knowledge, skills, and confidence of parents.

Caring for Autism
Practical Advice from a Parent and Physician
Michael Ellis, DO, St Francis Hospital
Caring for Autism: Practical Advice from a Parent and Physician delves into all these questions and more. As the father of a daughter with ASD and as a trained psychiatrist who specializes in ASD, Dr. Michael A. Ellis provides a holistic view of what comes after diagnosis. In user-friendly tones, he answers the most commonly asked questions about what it’s actually like to live with ASD, what medications and therapies are available, and the global impact it has on the child’s environment. With the help of his wife to provide a mother’s perspective, Dr. Ellis shares personal stories of their 10-year journey in order to provide insight and support for anyone – patient, parent, caregiver – traversing the difficulties of autism.

Alzheimer’s Disease and Dementia

What Everyone Needs to Know®

Steven R. Sabat
Georgetown University

Alzheimer’s Disease and Dementia: What Everyone Needs to Know® provides information not only about these conditions, but, crucially, about the many psychological and social strengths possessed by people diagnosed. Identifying and using those strengths can improve the quality of life of all concerned in non-pharmacological ways. This book thoroughly informs readers of the clinical history of these conditions, their causes and treatments, and methods of caring for and communicating effectively with those with AD.

Night Call
Embracing Compassion and Hope in a Troubled World

Robert Wicks
Loyola Maryland University

- Lessons that are normally available only to helping and healing professionals, now offered to a wider audience
- Emphasis on the practice of ‘faithfulness’ as opposed to a focus on ‘success’ which demonstrates how to avoid unnecessary discouragement in reaching out to others
- Insight into how to face failure, which can determine whether one will burn out or actually have the opportunity to deepen and grow as an individual

Told through anecdotes, clinical observations, and pearls of wisdom, and drawing from broad literature in psychology, philosophy, religion, and spirituality, Wicks weaves together stories of pain, hope, healing, and strength to guide readers through the night. This is the culmination of decades of experience of someone who trains the healers, and helps the helpers. Consequently, it affords readers the opportunity to learn the strategies that professional helpers, first responders, ministers, emergency workers, and soldiers have learned to use in dealing with loss, pain, trauma, and grief.

NEW EDITION
Systems of Psychotherapy
A Transtheoretical Analysis

NINTH EDITION
James O. Prochaska,
University of Rhode Island, and John C. Norcross, University of Scranton

- Presents numerous case studies within each psychotherapy system
- Provides unique perspectives on the limitations of each system of psychotherapy
- Explores the complexity and diversity of the leading theories of psychotherapy

Comprehensive, systematic, and balanced, Systems of Psychotherapy uses a wealth of clinical case illustrations to help readers understand a wide variety of psychotherapies – including psychoanalytic, psychodynamic, existential, person-centered, experiential, interpersonal, exposure, behavioral, cognitive, systemic, multicultural, and integrative. The Ninth Edition thoroughly analyzes 15 leading systems of psychotherapy and briefly surveys another 32, providing a broad scope of the field.

Innovations in Psychosocial Interventions and Their Delivery
Leveraging Cutting-Edge Science to Improve the World’s Mental Health

Alan E. Kazdin
Yale University

Innovations in Psychosocial Interventions and Their Delivery provides an integrated and detailed overview of advances, challenges, and necessary new directions with regard to evidence-based psychological interventions. Drawing on diverse fields such as public health, business, entertainment, social policy and law, and other domains that may inform efforts to deliver interventions more effectively, Alan Kazdin explores an assortment of novel and inventive ways to address the world’s mental health crisis.

Guns and Suicide
An American Epidemic

Michael D. Anestis
University of Southern Mississippi

- With rising suicide rates in the U.S., Anestis provides a much-needed understanding of suicide prevention and the critical role of means restriction
- Shifts the conversation about gun violence to suicides by guns, which make up the majority of gun deaths in the U.S.
- Anestis takes a poignant, balanced approach to reducing suicide risk; this is not a book about gun control

In Guns and Suicide, Michael Anestis reframes our perspective on gun violence by shifting the focus to suicide. Guns play a uniquely profound role in American suicide, and Anestis explains how they have this effect – not by making otherwise non-suicidal people want to die, but by facilitating suicide attempts among suicidal individuals.

**Change**

*What Really Leads to Lasting Personal Transformation*

Jeffrey A. Kottler. California State University - Fullerton

What causes human beings to make a significant change in their lives, a transformative shift in thinking and actions? This fundamental question has preoccupied philosophers, priests, politicians, authors, and scholars for centuries. Today, psychologists and therapists who sit with clients session after session have a unique window into the human psyche, watching the rhythms of change unfold in front of them every day, and yet the process remains a mystery. Research has shown that even in cases of unqualified success, the client and the therapist often have wildly different views on what made it work. Taking that as his starting point, Jeffrey Kottler leads the reader on an exploration of human behavior, seeking to find out what is that really makes a difference that can lead to transformative and lasting change.

**Postmodern Perspectives on Contemporary Counseling Issues**

Approaches Across Diverse Settings

Edited by Mark Scholl. Wake Forest University, and James Hansen. Oakland University

In Postmodern Perspectives on Contemporary Counseling Issues, the effective treatment of issues such as trauma, addiction, eating disorders, unemployment, and couples counseling are illustrated with numerous case examples. Rich descriptions of the implementation of postmodern approaches and techniques make this text ideal for counselors, psychotherapists, and other helping professionals.

**The Politics of Autism**

*What It Means For America*

Bryna Siegel. Autism Center of Northern California

- All drawn from data – readers explore unabashed contrarian views on autism epidemiology, autism service provision, autism education, and autism research
- New viewpoints on 'old' issues: Is there more autism? What’s wrong with how autism gets diagnosed? Are standard treatments really appropriate given the life course of people with autism?
- Why does fear of vaccines persist? Are we effectively allocating autism research dollars if the goal is to help people with autism?
- The Politics of Autism explores controversies in autism epidemiology, problems in effective autism education, motivators of the alternative medicine and anti-vaccine movement in autism, and argues for the re-examination of autism research priorities from basic science to clinical studies aimed at improving lives of individuals and their families living with autism. By exposing the sub rosa truths about autism that are often impolitic or seemingly too sensitive to discuss, each chapter focuses both on the controversies themselves, and how these controversies came to be. In addition, readers will find a chapter-by-chapter bibliography with URLs to many engaging references posted on the author’s website. References include popular media/internet resources.

After Digital
Computation as Done by Brains and Machines
James A. Anderson, Brown University
- Introduces different kinds of computation
- Merges evidence from neurobiology, technological history, and cognitive science
- Makes predictions about the near and far future

After Digital looks at where the field of computation began and where it might be headed, and offers predictions about a collaborative future relationship between human cognition and mechanical computation.

Sensorimotor Life
An Enactive Proposal
Ezequiel Di Paolo, Ikerbasque, Basque Foundation for Science, Thomas Buhrmann, and Xabier Barandiaran, both at University of the Basque Country
- Draws on recent theoretical developments in the ‘enactive’ approach to life and mind, examining and expanding the premises of the sciences of the human mind, whilst developing an alternative picture closer to people’s daily experiences
- Provides a theory of agency as organized networks of sensorimotor schemes and its implications for embodied subjectivity

Based on recent theoretical developments in the enactive approach to life and mind, this book elaborates a series of contributions to a non-representational theory of action and perception. These enactive ideas are applied and extended to provide a theory rich, naturalistic account of the sensorimotor meaning and agency.

How the Mind Comes into Being
Introducing Cognitive Science from a Functional and Computational Perspective
Martin V. Butz and Esther F. Kuffer, both at University of Tübingen, Germany
How is it that we can think highly abstract thoughts, seemingly fully detached from the actual, physical reality? This book offers an interdisciplinary introduction to embodied cognitive science, addressing the question of how the mind comes into being while actively interacting with and learning from the environment by means of the body.

Cognition and Communication in the Evolution of Language
Anne Reboul, Institute for Cognitive Sciences-Marc Jeannerod, CNRS and University LCB, Lyon 1
This book shows that language, though now routinely used for communication, actually primarily evolved as a system for thought. Anne Reboul proposes a new two-step approach whereby syntax first evolved as a system for thought, which was then externalized for communication due to social selection pressures.

Sensory Blending
On Synaesthesia and Related Phenomena
Edited by Ophelia Deroy, University of London
Synaesthesia is a strange sensory blending; synaesthetes report experiences of colours or tastes associated with particular sounds or words. This volume presents new essays by scientists and philosophers exploring what such cases can tell us about the nature of perception and its boundaries with illusion and imagination.

OXFORD UNIVERSITY PRESS
COGNITIVE PSYCHOLOGY

The Oxford Handbook of the Science of Science Communication
Edited by Kathleen Hall Jamieson, Annenberg Public Policy Center, University of Pennsylvania, Dan Kahan, Yale Law School, and Dietram A. Scheufele, University of Wisconsin-Madison
- Includes topical essays from leading science of science communication scholars
- Focuses on lessons from case study examples that can be learned both from communication failures and successes
- Contains novel subject matter not previously examined in scholarly writings
On topics from genetic engineering and mad cow disease to vaccination and climate change, this Handbook draws on the insights of 57 leading science of science communication scholars who explore what social scientists know about how citizens come to understand and act on what is known by science.

The Oxford Handbook of Functional Brain Imaging in Neuropsychology and Cognitive Neurosciences
Edited by Andrew C. Papanicolaou, The University of Texas Houston Health Science Center
A large part of the contemporary cognitive neuroscience literature involves functional neuroimaging, yet few readers are sufficiently familiar with it to appraise that literature correctly. The purpose of this Handbook is to enable them to understand the neuroimaging methods and evaluate their present contributions and future promise in the fields of cognitive neuroscience and neuropsychology. The chapters contain very accessible descriptions of the various methods and an objective account of their clinical and research applications.

Endocrine Disruptors, Brain, and Behavior
Heather B. Patiassou, and Scott M. Belcher, both at North Carolina State University

Our world and bodies are becoming increasingly polluted with chemicals capable of interfering with our hormones and thus, possibly, our present and future neural and mental health. This book focuses on how and why these chemicals, known as endocrine disrupting compounds (EDCs), affect the development and function of the brain and might be contributing to neural disorders rapidly rising in prevalence. It provides an overall synthesis of the EDC field including its historical roots, major hypotheses, key findings, public health policy implications, and research gaps.

The Evolution of Memory Systems
Ancestors, Anatomy, and Adaptations
Elisabeth A. Murray, Steven P. Wise, and Kim S. Graham, University of Cardiff

The Evolution of Memory Systems sets out a bold and exciting new theory about memory. It proposes that several memory systems arose during evolution and that they did so for the same general reason: to transcend problems and exploit opportunities encountered by specific ancestors at particular times and places in the distant past.

COGNITIVE PSYCHOLOGY

The Elephant in the Brain
Hidden Motives in Everyday Life
Kevin Simler and Robin Hanson
• A social critique and contrarian view that challenge the status quo
• Challenges how you think about yourself and how you see the world by shining a light on things people would rather stay hidden
• Wide-ranging, covering many fields and current events, and offering many concrete relatable examples

This book exposes our unconscious selfish motives, those we’re reluctant to discuss or even think about. These motives drive our body language, laughter, and conversation, as well as venerated institutions like art, school, charity, medicine, politics, and religion. You’ll never see yourself, or the world, the same again.

On Concepts, Modules, and Language
Cognitive Science at Its Core
Edited by Roberto G. de Almeida, Concordia University, and Lila R. Gleitman, University of Pennsylvania

What are the landmarks of the cognitive revolution? What are the core topics of modern cognitive science? Where is cognitive science heading to? Leading cognitive scientists – Chomsky, Pylyshyn, Gallistel, and others – examine their own work in relation to one of cognitive science’s most influential and polemical figures: Jerry Fodor.

The Rise of Homo Sapiens
The Evolution of Modern Thinking
SECOND EDITION
Frederick L. Coolidge and Thomas Wynn

- Emphasizes the archaeological record of cognitive evolution
- Advocates enhanced working memory as a model for understanding cognitive evolution

The Rise of Homo sapiens is an introduction to human cognitive evolution written by psychologist Frederick L. Coolidge and archaeologist Thomas Wynn. The text differs from other treatments of cognitive evolution in its reliance on the archaeological record, and its emphasis on working memory, the most thoroughly investigated cognitive model of the last half-century.

Sizing up Consciousness
Towards an Objective Measure of the Capacity for Experience
Marcello Massimini, University of Milan, and Giulio Tononi, University of Wisconsin-Madison School of Medicine

- Explains, for a general audience, one of the major theories of consciousness
- Explores its implications for the treatment of those in a vegetative state or coma
- Written by 2 well known leading figures in the field of consciousness

This book explores how we can measure consciousness. It clarifies what consciousness is, how it can be generated from a physical system, and how it can be measured. It also shows how conscious states can be expressed mathematically and how precise predictions can be made using data from neurophysiological studies.

The Brain
What Everyone Needs To Know®
Gary L. Wenk, Ohio State University
• A readable and highly entertaining resource on how the brain works
• The author’s extensive experience as a teacher and scientist brings perspective and insight that go beyond simply reading a list of facts about brain function
• Interprets the current state of knowledge and distills the essence of what is important to everyday lives

This entertaining tour of the brain answers such fundamental questions as, What is the purpose of the brain? What is an emotion? What is a memory? How does food affect how you feel? Dr. Wenk has skillfully blended the highest scholarly standards with illuminating insights, gentle humor, and welcome simplicity.

How the Brain Creates Reality
SECOND EDITION
Armin Schnider, University Hospital of Geneva
This new edition gives an up-to-date account of the causes, anatomical basis, and mechanisms of confabulations. It traces the history of the phenomenon of false memories, considers a range of clinical cases, and makes important recommendations for future study. It is essential for neurologists, psychiatrists, and cognitive neuroscientists.

NEW IN PAPERBACK
The Developing Genome
An Introduction to Behavioral Epigenetics
David S. Moore, Pitzer College and Claremont Graduate University in Southern California
An accessible introduction to behavioral epigenetics, The Developing Genome explores how experiences influence genetic activity. We develop as we do not because of the genes we have, but because of what our genes do. The Developing Genome explains this new discipline and its revolutionary implications, changing how we understand development and evolution.

NEW EDITION
Sex, Lies, and Brain Scans
How fMRI reveals what really goes on in our minds
Barbara J. Sahakian, and Julia Gottwald, both at University of Cambridge
The potential of fMRI is extraordinary. It allows us to observe brain activity in real time, build an understanding of thoughts and motivations, and discern unconscious biases. In a limited but real way we can now ‘read minds’. Barbara Sahakian and Julia Gottwald explain the science, and consider the ethical implications of using these techniques.

Present day neuroscience places the brain at the centre of study. But what if researchers viewed the brain not as the foundation of life, rather as a mediating organ? Ecology of the Brain addresses this very question. It considers the human body as a collective, a living being which uses the brain to mediate interactions.

Ecology of the Brain
The Phenomenology and Biology Of The Embodied Mind
Thomas Fuchs, Heidelberg University

Hidden beneath consciousness, the brain mechanisms controlling personal space affect every aspect of our lives – social, emotional, cultural, and practical. A neuroscientist, award-winning novelist, and science columnist for The Atlantic, Graziano tells this compelling story with humor, drama, and a deeply personal connection.

The Spaces Between Us
A Story of Neuroscience, Evolution, and Human Nature
Michael Graziano, Princeton University

Written in a narrative style with clarity, humor, drama, and personal connection

Offers insight on what is going on inside the brain of those with developmental disability

Describes the author’s personal struggles raising a son diagnosed with dyspraxia

# NEUROPSYCHOLOGY

## The Role of Technology in Clinical Neuropsychology

**The Role of Technology in Clinical Neuropsychology**

Edited by Robert L. Kane, Neuropsychology Associates of Fairfax and Thomas D. Parsons, University of North Texas

Neuropsychology as a field has been slow to embrace and exploit the potential offered by technology to either make the assessment process more efficient or to develop new capabilities that augment the assessment of cognition. *The Role of Technology in Clinical Neuropsychology* details current efforts to use technology to enhance cognitive assessment with an emphasis on developing expanded capabilities for clinical assessment.

## Neuroethics: Anticipating the Future

**Neuroethics: Anticipating the Future**

Edited by Judy Illes, University of British Columbia

Over the last decade, there have been unparalleled advances in our understanding of brain sciences. In this volume on neuroethics, a distinguished group of contributors from a range of disciplines discuss the ethical implications of this newfound knowledge and set out the many necessary considerations for the future.

## Neurological Assessment in the Age of Evidence-Based Practice

**Neurological Assessment in the Age of Evidence-Based Practice**

Edited by Stephen C. Bowden

Evidence-based practice facilitates the identification of clinically relevant research findings with strong scientific validity. Written by some of the foremost experts in the field, this volume shows clinical neuropsychologists how to undertake evidence-based practice and to conduct critical appraisal of published research on diagnostic tests or treatments for neuropsychological disorders to find the best evidence for any specific patient needs.

**The Neuropsychology Fact-Finding Casebook**

*A Training Resource*

Kirk J. Stucky, Hurley Medical Center, and Shane S. Bush, Long Island Neuropsychology, P.C.

- 24 fact-finding case exercises broken down into steps for independent evaluation process training and comprehension
- Supplementary Powerpoints offered for use in study groups and workshops as a way to simulate a referred case
- Introductory chapters offer practical guidance in approaching the fact-finding examination

Use of a structured fact-finding approach that is based on sound clinical judgment and applied flexibility facilitates good clinical decision making and patient care in neuropsychology. This Casebook is a standardized approach to fact-finding that training programs at various levels can use to help trainees develop significant evaluation skills such as case conceptualization, differential diagnosis, and recommendations for patients with a wide range of presenting problems.

**The Independent Neuropsychological Evaluation**

Howard J. Oakes, Hartford Hospital/Institute of Living, David W. Lovejoy, MassMutual Financial Group, and Shane S. Bush

- Follows a clear and easy to use framework for assessment approach
- Written in a plain and common sense style
- Includes case examples and practical resources

This book provides an overview of the context and specific issues that arise when performing disability-related independent evaluations, with a focus on neuropsychological assessment.

**Collaborative Remembering**

*Theories, Research, and Applications*

Edited by Michelle L. Meade, Montana State University, Celia B. Harris, Penny Van Bergen, John Sutton, and Amanda J. Barnier, all at Macquarie University

We remember in social contexts. We reminisce about the past together, collaborate to remember shared experiences, and remember in the context of our communities and cultures. This book explores the topic of collaborative remembering across a wide range of fields, including developmental, cognitive, and social psychology.

**Neuropsychological Evaluation of the Child**

*Domains, Methods, and Case Studies*

Second Edition

Ida Sue Baron, University of Virginia School of Medicine

- A unique and practical edition that compiles published and unpublished normative data for individual neuropsychological tests in one resource/reference text
- Reviews basic skills required for history taking, administration, interpretation, and communication of results
- Addresses critical topics in neuropsychology and neurology in domain-specific chapters

This updated and expanded edition retains a practical developmental and lifespan perspective for neuro-psychological case formulation. Chapters cover the current status, clinical issues, and essential domains and techniques in clinical neuropsychological practice and research, and include case vignettes that explicate brain-behavior relationships in youth from preschool-age through adolescence with medical disease or psychological disorder.

**Psychopharmacology**

*Drugs, the Brain, and Behavior*

Third Edition

Jerrold S. Meyer, University of Massachusetts - Amherst, and Linda F. Quenzer, University of Hartford

Unique in its breadth of coverage ranging from historical accounts of drug use to clinical and preclinical behavioral studies, Psychopharmacology is appropriate for undergraduates studying the relationships between the behavioral effects of psychoactive drugs and their mechanisms of action.

**UK:** Apr 2018 / **US:** Feb 2018

| PB | £64.99/$99.95
| (Published by Sinauer Associates, an imprint of Oxford University Press) |
For those new to the field of resting state fMRI, the large variety of approaches to functional connectivity analysis is highly confusing. This primer provides an introduction to the concepts and analysis decisions that need to be made at every step of the processing pipeline, starting from data acquisition through to interpretation of findings.
Music, Evolution, and The Harmony Of Souls

Alan R. Harvey. The University of Western Australia

- The first book about music that discusses human evolution in detail
- Offers new perspectives on the biological and cultural history of our species
- Demonstrates the value of music in education and therapy

Music, Evolution, and the Harmony of Souls demonstrates the evolutionary sociobiological importance of music as a driver of cooperative and interactive behaviour throughout human existence, and what this evolutionary imperative means to twenty-first century humanity and beyond, from social and medical/neurological perspectives.

NEW EDITION

The Child as Musician

A Handbook of Musical Development
SECOND EDIION
Edited by Gary E. McPherson. University of Melbourne

The new edition of The Child as Musician celebrates the richness and diversity of the many different ways in which children can engage in and interact with music. It presents theory – both cutting edge and classic – in an accessible way for readers by surveying research concerned with the development and acquisition of musical skills.

978-0-19-881714-7 | PB | 704pp £34.99/$45

NEW EDITION

The Oxford Handbook of Music Psychology
SECOND EDITION
Edited by Susan Hallam, University College London, Ian Cross, University of Cambridge, and Michael Thaut, Colorado State University, Fort Collins

The 2nd edition of the Oxford Handbook of Music Psychology updates the original landmark text, providing a comprehensive review of the latest developments in this fast growing area of research. With contributions from internationally recognised experts, it is an essential resource for students and researchers in psychology.

UK: Dec 2017 / US: Jan 2018

CRIMINAL & FORENSIC PSYCHOLOGY

**The Ethical Practice of Forensic Psychology: A Casebook**
Edited by Gianni Pirelli, Private Practice, Robert A. Betkey, and Patricia A. Zapf, both at The City University of New York.

The Ethical Practice of Forensic Psychology highlights the ethical standards and guidelines set forth by the American Psychological Association’s (APA) Ethical Principles of Psychologists and Code of Conduct (EPPCC) and the Specialty Guidelines for Forensic Psychology (SGFP). This Casebook provides readers with a practical review of these ethical standards and professional guidelines in the context of forensic case vignettes with corresponding commentary by leaders in the field.

**The Jury Under Fire: Myth, Controversy, and Reform**
Brian H. Bornstein, University of Nebraska – Lincoln, and Edie Greene, University of Colorado, Colorado Springs.

The Jury Under Fire reviews a number of controversial beliefs about juries that have persisted in recent years as well as the implications of these views for jury reform efforts. Each chapter focuses on a mistaken assumption or myth about jurors or juries, critiques the myth, and then uses social science research findings to suggest appropriate reforms.

**Choosing Not to Choose**
Gideon Yaffe presents a theory of criminal responsibility according to which child criminals deserve leniency not because of their psychological, behavioural, or neural immaturity but because they are denied the vote. He argues that full shares of criminal punishment are deserved only by those who have a full share of say over the law.

978-0-19-880332-4 | HB | 256pp | £30/$40
Available as an Ebook | Available in Oxford Scholarship Online

**The Oxford Handbook of Sex Offences and Sex Offenders**
Edited by Teela Sanders, University of Leicester.

The Oxford Handbook on Sex Offences and Sex Offenders provides comprehensive, even-handed analysis of the myriad of topics related to sex offenses, including pornography, sex trafficking, criminal justice responses, and the role of social media in sex crimes. Extending beyond the existing scholarly research on the topic, this volume teases out the key debates, controversies, and challenges involved in addressing sex crimes.

Overview Online at: www.oup.com
Criminology & Forensic Psychology

The Roots of Modern Psychology and Law: A Narrative History
Edited by Thomas Grisso, University of Massachusetts Medical School, and Stanley L. Brodsky, The University of Alabama
- Shows the development of the field of psychology and law through the narratives of its founders
- Entirely devoted to the history of psychology and law
- Publication coincides with the 50th Anniversary of the American Psychology-Law Society

Objection: Disgust, Morality, and the Law
Debra Lieberman, University of Miami, and Carlton Patrick, Licensed Attorney
- Sets forth a novel psychological explanation for why the emotion of disgust and our sense of morality are deeply intertwined
- Authors argue for why disgust should not be used as a criterion for lawmaking
- Opens up the debate for whether or not certain behaviors can be deemed ‘wrong’ absent of a gut feeling that they are ‘gross’ or ‘offensive’

Assessing Negative Response Bias in Competency to Stand Trial Evaluations
Steven J. Rubenzer, Forensic Sobriety Assessment, LLC
- Sets forth a comprehensive guide to assessing whether a defendant has feigned mental impairment during a CST evaluation, or simply did not put forth his/her best effort
- This book reviews the literature on assessing feigning and negative response bias, with particular focus on issues, tests, and data relevant to CST evaluations, and examines proposed criteria and statistical methods of determining and classifying assessment results
- It introduces readers to aspects of the vibrant neuropsychological response style literature, an area many forensic psychologists appear to have overlooked
- Additionally, it offers recommendations for research and policy regarding the parameters of CST assessment

Traumatic Divorce and Separation:
The Impact of Domestic Violence and Substance Abuse in Custody and Divorce
Lisa Fischel-Wolovick, Attorney
- This book is an integration of the study of trauma, divorce, and separation impacted by domestic violence, substance abuse, and mental illness
- While the original research on divorce took place at roughly the same time as the field of trauma, social scientists did not integrate an understanding of trauma into their understanding of domestic violence and divorce
- During divorce, such families are impacted by a history of traumatic exposure to abuse and require court intervention that cannot be addressed by mediation or alternative dispute resolution
- They require a trauma-informed interdisciplinary response
- The text also discusses gender bias against women in the courts and the gender bias task force movement

Flourishing in Emerging Adulthood
Positive Development During the Third Decade of Life
Edited by Laura M. Padilla-Walker, and Larry J. Nelson, both at Brigham Young University
- Includes personal essays written by emerging adults from diverse backgrounds, providing their perspective on challenges and successes across a wide range of topics
- One of the first works to consider ways in which young people flourish during emerging adulthood
- An engaging foreword written by Dr. Lene Arnett Jensen reflects on how readers can relate to emerging adults and contribute to their flourishing

Flourishing in Emerging Adulthood highlights the third decade of life as a time in which individuals have diverse opportunities for positive development.
Emerging Adulthood Series
978-0-19-026063-7 | HB | 172pp £41.49/$55
Available as an Ebook | Available in Oxford Scholarship Online

The Marriage Paradox
Why Emerging Adults Love Marriage Yet Push it Aside
Brian J. Willoughby and Spencer L. James, both at Brigham Young University
- First attempt to explain through data and theory why emerging adults are retreating from marriage despite reporting that it is still important to them
- Gives voice to emerging adults’ views on marriage with quotations from them throughout
- For the first time, fully describes the findings of a three-year, mixed-methods study on marriage among emerging adults

The Marriage Paradox explores both national U.S. data and a smaller sample of emerging adults to find out how they really view marriage today. Interspersed with real stories and insight from emerging adults themselves, this book attempts to make sense of the increasingly paradoxical ways that young adults are thinking about marriage.

Executive Functions in Children’s Everyday Lives
A Handbook for Professionals in Applied Psychology
Edited by Maureen J. Hoskyn, Grace Iarocci, both at Simon Fraser University, and Arlene R. Young, University of Guelph
Executive Functions in Children’s Everyday Lives captures the diversity and complexity of the executive system that underlies children’s everyday life experiences. Acquisition of executive functions, such as interpreting communication cues and the perspectives of others, is foundational to and a function of children’s early social and communicative competencies.
978-0-19-998086-4 | HB | 200pp £41.99/$65.99
Available as an Ebook | Available in Oxford Scholarship Online

Self-Esteem in Time and Place
How American Families Imagine, Enact, and Personalize a Cultural Ideal
Peggy J. Miller, University of Illinois at Urbana-Champaign, and Grace E. Cho, St. Olaf College
Self-Esteem in Time and Place reveals how self-esteem became a touchstone of American childrearing in the early years of the 21st century.
Child Development in Cultural Context Series

**DEVELOPMENTAL & CHILD PSYCHOLOGY**

---

**Twice Exceptional**

**Supporting and Educating Bright and Creative Students with Learning Difficulties**

Edited by Scott Barry Kaufman, University of Pennsylvania

- Offers a new, comprehensive definition of twice-exceptional (2e) children, grounded in the latest research
- Focuses on diverse populations of learning disabilities (e.g., dyslexia, autism, ADHD) as well as racial/ethnic groups
- Includes unique perspectives from clinicians, researchers, and educators

**Twice Exceptional: Supporting and Educating Bright and Creative Students with Learning Difficulties**

provides cutting-edge, evidence-based approaches to creating an environment where twice-exceptional students can thrive. Viewing the 2e student as neither exclusively disabled nor exclusively gifted, but, rather, as a dynamic interaction of both, leading experts offer holistic insight into identification, social-emotional development, advocacy, and support for 2e students.

**Why Children Follow Rules**

**Legal Socialization and the Development of Legitimacy**

Tom R. Tyler, Yale University, and Rick Trinkner, Arizona State University

Why Children Follow Rules focuses on the process by which children and adolescents develop their orientation toward the law. Drawing on law, psychology, sociology and criminology, Tom Tyler and Rick Trinkner review the literature on socialization with a particular focus on families, schools, and the juvenile justice to reveal a fundamental conflict about how authority and power should be exercised in essential social institutions. They argue for the merits of consensual authority as a way to foster the popular legitimacy of the law at a time when public trust in the police, courts, and the law has reached unsettling lows.

Good People, Bad Managers
How Work Culture Corrupts Good Intentions
Samuel A. Culbert, UCLA

- Makes a powerful case that modern organizational culture ends up twisting good intentions into bad management behavior
- Argues that the problem starts at the beginning, with the lessons managers learn out of necessity moving up, and with MBA programs that teach “success” skills rather than crucial management skills

In Good People, Bad Managers, author Samuel A. Culbert explains how to shift managers’ mindsets and to encourage them to break from the culturally written “good management” scripts they enact— to conduct themselves more intelligently, other-sensibly, and, as opportunities arise, to contribute to the common good. Good People, Bad Managers teaches leaders what they gain from removing barriers to allowing employees their own voices, and how they, along with everyone in their company, can benefit from managers evolving.

Boost!
How the Psychology of Sports Can Enhance your Performance in Management and Work
Michael Bar-Eli, Ben-Gurion University

- Emphasizes the sometimes hidden, often over-looked, psychological forces that drive human performance, from stress and arousal to motivation, aspiration to self-confidence, decision processes and creativity to social dynamics, and mental preparation to morality
- Highlights findings known by elite athletes that are universally applicable, particularly in competitive, stressful, or high-stake business situations

Boost breaks down the complex behavioral science of getting ahead. Through original scientific research, unique case studies, and anecdotes from the world of sports and beyond, Bar-Eli explains the psychological underpinnings of human behavior and how we can harness this knowledge to perform at our highest levels, succeeding in our careers and personal lives.

What You Don’t Know about Leadership, but Probably Should
Applications to Daily Life
Jeffrey A. Kotter, California State University - Fullerton

• Appeals to all audiences, professional and general alike
• Applies strategies from group therapy and systemic intervention models to the realities that people face every day

This book explores ways that leadership skills and interventions can operate throughout daily life. Applications from group therapy and systemic intervention models are applied to the realities that people face every day – inspiring others, facilitating meetings, running social events, guiding conversations, and empowering others.

Talent Without Borders
Global Talent Acquisition for Competitive Advantage
Robert E. Ployhart, University of South Carolina, Jeff A. Weekley, University of Texas at Dallas, and Julian Dalzell, University of South Carolina

• Offers guidance on the practical issues that influence the implementation of global staffing solutions
• Emphasizes national culture, strategy, and competitive advantage

Talent Without Borders offers a practical approach to help managers think about acquiring talent globally. With explicit consideration of real-world issues that influence the implementation of global staffing solutions, the book shows managers how to use analytics and data to enable evidence-based decisions. Emphasizing national culture, strategy, and competitive advantage, it considers the entire talent life cycle, from attraction through retention.

ORGANIZATIONAL PSYCHOLOGY
Order Online at: www.oup.com
Understanding “I”
Language and Thought
José Luis Bermúdez
Texas A&M University
No words in English are shorter than ‘I’ and few, if any, play a more fundamental role in language and thought. José Luis Bermúdez develops a model of how language-users understand sentences involving the first person pronoun ‘I’. This model illuminates the unique psychological role that self-conscious thoughts play in action and thought.

Phenomenology and the Limits of Objectivity
The Case for Subjective Physicalism
Robert J. Howell
Southern Methodist University
Robert J. Howell offers a new account of the relationship between conscious experience and the physical world, based on a neo-Cartesian notion of the physical and careful consideration of three anti-materialist arguments. His theory of subjective physicalism reconciles the data of consciousness with the advantages of a monistic, physical ontology.

Understanding the Unconscious Mind
Of ourselves as moral agents with empirical work on responsibility, which reconciles our understanding of agency and seems to suggest not: reflection and self-awareness psychological research. Do we know what, Washington
and Agency
José M. Doris
University in St. Louis
Do we know what we’re doing, and why? Psychological research seems to suggest not: reflection and self-awareness are surprisingly uncommon and inaccurate. John M. Doris presents a new account of agency and responsibility, which reconciles our understanding of ourselves as moral agents with empirical work on the unconscious mind.

Philosophical Issues in Psychiatry IV
Psychiatric Nosesy
Edited by Kenneth S. Kendler, Virginia Commonwealth University, and Josef Parnas, University of Copenhagen
• Presents a truly interdisciplinary discussion of the topic, capturing a dynamic discussion between psychiatrists, philosophers, historians, and psychologists
• Includes chapters by leading academics in their respective fields, resulting in a book that is commanding and compelling
The revisions of both DSM-IV and ICD-10 have again focused the interest of the field of psychiatry and clinical psychology on the questions of nosology. This book reviews issues within psychiatric nosology from clinical, historical and particularly philosophical perspectives. It brings together an interdisciplinary group of distinguished authors.

Gallagher argues that the brain is not secluded from the world or isolated in its own processes, but rather is dynamically connected with body and environment. He offers a new, integrated reading of Deleuze’s The Logic of Sense (1969) by understanding it as a ‘psychoanalysis of sense’.

The Oxford Handbook of Philosophy of Cognitive Science
Edited by Eric Margolis, University of British Columbia, Richard Samuels, Ohio State University and Stephen P. Stich, Rutgers University

This volume offers an overview of the philosophy of cognitive science that explores how theories of the mind, psychology and cognitive anthropology, and neuroscience one of the hottest topics in cognitive science.

Beyond Concepts
Uniccepts, Language, and Natural Information
Ruth Garrett Millikan, University of Connecticut

Ruth Garrett Millikan presents a strikingly original account of how we get to grips with the world in thought. Her question is Kant’s ‘How is knowledge possible?’, answered from a contemporary naturalist standpoint. We begin with an understanding of what the world is like prior to cognition, then develop a theory of cognition within that world.

Attention, Not Self
Jonardon Ganeri, New York University

Jonardon Ganeri presents a radically reoriented account of mind, to which attention is the key. It is attention, not self, that explains the experiential and normative situatedness of humans in the world. Ganeri draws together three disciplines: analytic philosophy and phenomenology, cognitive science and psychology, and Buddhist thought.

Enactivist Interventions
Rethinking the Mind
Shaun Gallagher, University of Memphis

Enactivist Interventions is an interdisciplinary work that explores how theories of embodied cognition illuminate many aspects of the mind, including perception, affect, and action. Gallagher argues that the brain is not secluded from the world or isolated in its own processes, but rather is dynamically connected with body and environment.

NEW EDITION
Consciousness
A Very Short Introduction
SECOND EDITION
Susan Blackmore, University of Plymouth

Some of our most burning questions surround consciousness: What creates our identity? Do we really have free will? Is consciousness itself an illusion? The rapid rate of developments in brain science continues to open up debate on these issues. This book clarifies the complex arguments and illuminates the major theories on consciousness.

Explanation and Integration in Mind and Brain Science
Edited by David M. Kaplan, Macquarie University

Is the relationship between psychology and neuroscience one of autonomy or mutual constraint and integration? This volume includes new papers from leading philosophers seeking to address this issue by deepening our understanding of the similarities and differences between the explanatory patterns employed across these domains.

Critical Theory and Feeling
The Affective Politics of the Early Frankfurt School
Simon Russell

This book examines the vital role of affect and feeling within the work of the early Frankfurt School. The author investigates a range of concepts – including melancholia, hope, (un)happiness, objects, and mimesis – and argues that a contemporary reading of critical theory needs to accommodate an adequate understanding of affect.
The first half of this book argues that physicalism cannot account for consciousness, and hence cannot be true. The second half explores and defends Russellian monism, a radical alternative to both physicalism and dualism. The view that emerges combines panpsychism with the view that the universe as a whole is fundamental.

**The Character Gap**

How Good Are We?

Christian B. Miller, Wake Forest University

We like to think of ourselves and our friends and families as pretty good people. The more we put our characters to the test, however, the more we see that we are a mixed bag. Fortunately there are some promising strategies – both secular and religious – for developing better characters.

**Knowing Emotions**

Truthfulness and Recognition in Affective Experience

Rick Anthony Furtak, Colorado College

In Knowing Emotions, Furtak argues that it is only through the emotions that we can perceive meaning in life, and only by feeling emotions that we are able to recognize the value or significance of anything whatsoever. Our affective responses and dispositions therefore play a critical role in human existence, and their felt quality is intimately related to the awareness they provide.

**Perceptual Imagination and Perceptual Memory**

Fiona Macpherson

This volume presents ten new essays on the nature of perceptual imagination and perceptual memory. The central questions are: How do perceptual imagination and memory resemble and differ from each other and from other kinds of sensory experience? And what role does each play in perception and in the acquisition of knowledge?

**The Implicit Mind**

Cognitive Architecture, the Self, and Ethics

Michael Brownstein, John Jay College of Criminal Justice, CUNY

The central contention of The Implicit Mind is that understanding the two faces of spontaneity—its virtues and vices—requires understanding the ‘implicit mind.’ In turn, Michael Brownstein maintains that understanding the implicit mind requires the consideration of three sets of questions. First, what are implicit mental states? What kind of cognitive structure do they have? Second, how should we relate to our implicit attitudes? Are we responsible for them? Third, how can we improve the ethics of our implicit minds?
INNER LIVES

The Divine Madness of Philip K. Dick
Kyle Arnold, SUNY Downstate Medical Center
In *The Divine Madness of Philip K. Dick*, clinical psychologist Kyle Arnold takes readers on a journey into the wild world of this iconic yet troubled legend of science fiction and fantasy. *Inner Lives*.

Light Come Shining
The Transformations of Bob Dylan
Andrew McCarron, Teacher, Trinity School
Bob Dylan’s frequent changes have led to a dizzying accumulation of masks. In this psychobiography, Andrew McCarron looks across the surfaces of these masks and reveals a life characterized by more coherence than fragmentation. At the heart of this coherence is a repetitive story of spiritual death and rebirth. *Inner Lives*.

Not in My Family

**German Memory and Responsibility After the Holocaust**

 Roger Frie, Simon Fraser University

- Using his German family history as a guide, Frie examines what is involved in transforming familiar stories into an informed understanding of the Nazi past and responsibility for the Holocaust.
- Frie deals directly with difficult and painful subject matter by using autobiographical tools that include his own family history for the last three generations.
- Bridges personal and intellectual reflection in psychology and history in a wholly productive, positive, and moving way for readers of all backgrounds.

Roger Frie explores what it means to discover his family’s legacy of a Nazi past. Using the narrative of his grandfather as a starting point, he shows how the transfer of memory from one German generation to the next keeps the forbidding reality of the Holocaust at bay.

*Explorations in Narrative Psychology*  

---

The Narrative Complexity of Ordinary Life

**Tales from the Coffee Shop**

 William L. Randall, St. Thomas University

In The Narrative Complexity of Ordinary Life, William L. Randall makes the case that all people function as narrative psychologists by continually storying their lives— as well as those of others—in memory and their imagination.

*Explorations in Narrative Psychology*  

---

A New Narrative for Psychology

Brian Schiff, American University of Paris

A New Narrative for Psychology focuses on how we study and think about persons and the goals of psychological understanding. By critiquing contemporary variable-centered and statistical methods, this book investigates what these approaches leave unexplored by presenting a cutting-edge perspective for theorizing and studying the thorny problem of human meaning making.

*Explorations in Narrative Psychology*  

---

Entangled Narratives

**Collaborative Storytelling and the Re-Imagining of Dementia**

Lars-Christer Hyden, Linköping University, Sweden

In Entangled Narratives, Lars-Christer Hyden emphasizes the possibilities that are inherent in collaborative storytelling with individuals with dementia. He instructs professionals and otherwise healthy relatives to learn how to effectively listen and, ultimately, re-imagine their patients and loved ones as collaborative meaning-makers in their lives.

*Explorations in Narrative Psychology*  

---

The Ethics of Storytelling

**Narrative Hermeneutics, History, and the Possible**

Hanna Meretoja, University of Turku, Finland

Hanna Meretoja’s The Ethics of Storytelling: Narrative Hermeneutics, History, and the Possible develops a nuanced framework for exploring the ethical complexity of the roles narratives play in our lives. Focusing on how narratives enlarge and diminish the spaces of possibilities in which we act, think, and re-imagine the world together with others, this book proposes a theoretical-analytical framework for engaging with both the ethical potential and risks of storytelling.

Life and Narrative

**The Risks and Responsibilities of Storying Experience**

Edited by Brian Schiff, American University of Paris, A. Elizabeth McKim, St. Thomas University, and Sylvie Patron, American University of Paris

Life and Narrative examines the perennial mystery of how people encounter, manage, and inhabit a self and a world of their own—and others’—creation and the ramifications of these creations. From both literary and social science perspectives, this volume grapples with the process of how life and narrative interact with each other.

**The Happiness Effect**

*How Social Media is Driving a Generation to Appear Perfect at Any Cost*

Donna Freitas, University of Notre Dame

Foreword by Christian Smith, University of Notre Dame

- Looks behind the headlines to examine how young people really feel about social media
- Pairs large online survey data with in-depth, personal interviews with students from thirteen college campuses across the US
- Sexting, Cyberbullying, Narcissism. People—and especially the media—are consumed by fears about the effect of social media on young people. We hear constantly about the dangers that lurk online, and about young people’s seemingly pathological desire to share anything and everything about themselves with the entire world.

---
There is a vast body of research supporting the Five Factor Model as the predominant model of general personality structure within the field of social psychology. The Oxford Handbook of the Five Factor Model is dedicated to this model of research.

The Oxford Handbook of Social Influence

Edited by Stephen G. Harkins, Northeastern University; Kipling D. Williams, Purdue University; and Jerry M. Burger, Santa Clara University

The Oxford Handbook of Social Influence restores this important field to its once preeminent position within social psychology. Editors Harkins, Williams, and Burger lead a team of leading scholars as they explore a variety of topics within social influence, seamlessly incorporating a range of analyses (including intrapersonal, interpersonal, and intragroup), and examine critical theories and the role of social influence in applied settings today.

The Oxford Handbook of Hope

Edited by Matthew W. Gallagher, University of Houston, and Shane J. Lopez, Gallup

The Oxford Handbook of Hope provides a comprehensive overview of the past twenty-five years of research demonstrating when, how, and why hope promotes positive outcomes across contexts and the lifespan.

The Oxford Handbook of Stigma, Discrimination, and Health

Edited by Brenda Major, University of California, Santa Barbara; John F. Dovidio, Yale University; and Bruce G. Link, Columbia University

Stigma leads to poorer health. In The Oxford Handbook of Stigma, Discrimination, and Health, leading scholars identify stigma mechanisms that operate at multiple levels to erode the health of stigmatized individuals and, collectively, produce health disparities. This book provides unique insights concerning the link between stigma and health across various types of stigma and groups.

The Oxford Handbook of the Human Essence

Edited by Martijn van Zomeren, University of Groningen, Bruce G. Link, Yale University, and MaryAnne L. Fisher, Santa Mary's University

Humans can be viewed as biological beings as well as cultural creatures, rational reasoners as well as emotional enigmas, moral minds as well as amoral agents. Edited by Martijn van Zomeren and John F. Dovidio, The Oxford Handbook of the Human Essence expertly articulates both what social psychology can tell us about the human essence, and the astonishing range of perspectives reflected within this field.

The Oxford Handbook of Women and Competition

Edited by Maryanne L. Fisher, Santa Mary's University

The Oxford Handbook of Women and Competition is one of the first scholarly volumes to focus specifically on competition and the competitive forces between women. Chapters provide readers with a definitive view of the current state of research, and collectively address the adaptive and socio-cultural foundations of women's competitive behavior, motivations, and cognitions.

The Oxford Handbook of Acculturation and Health

Edited by Seth J. Schwartz, University of Miami, and Jennifer Unger, University of Southern California

The Oxford Handbook of Acculturation and Health brings together acculturation theory and methodology with work linking acculturative processes to overall health outcomes. The blending of these two streams of literature is critical to move advances in acculturation theory and research into practical application for researchers, practitioners, educators, and policy makers.

Cheap Sex
The Transformation of Men, Marriage, and Monogamy
Mark Regnerus, University of Texas, Austin

Sex is cheap. This new wide ease of sexual access has been made possible by technology far more than by political or religious shifts. Drawing on survey and interview data, the book scrutinizes the American mating market, highlighting how men’s interests have been made possible by the ease of sexual access.

Women’s Human Rights
A Social Psychological Perspective on Resistance, Liberation, and Justice
Edited by Shelly Grabe, University of California, Santa Cruz

This book contributes to the discussion of why women’s human rights warrants increased focus in the context of globalization. Further, it also illustrates how psychology can provide the links between transnational feminism and the discourse on women’s human rights by drawing on activist scholarship and empirical findings based on grassroots resistance.

Handbook of Disability Sport and Exercise Psychology
Jeffrey J. Martin, Wayne State University

• A comprehensive volume featuring 40 chapters spanning three sections on research, sport, and exercise
• Features commentary on Wounded Warriors and Paralympic research
• One of the first comprehensive textbooks devoted to analyzing the knowledge base in exercise and sport psychology involving individuals with disabilities

Jeffrey J. Martin’s Handbook of Disability Sport and Exercise Psychology is one of the first comprehensive textbooks devoted to describing and analyzing the knowledge base in exercise and sport psychology involving individuals with disabilities. This book examines topics ranging from mental skills, barriers to exercise, gender, self-esteem, anxiety, and athletic identity, to work with Paralympians and Wounded Warriors.

Paths to Fulfillment
Women’s Search for Meaning and Identity
Ruthellen Josselson, Fielding Graduate University

• Presents the true life stories of a special cohort of baby boomers women who were the first to take advantage of new possibilities for women and, in doing so, created the sea change in the roles they could take on in the world
• Explores the types of paths this generation of women were able to follow over 35 years, and where they are now as a result of these choices
• Links the choices women make in their early 20s to the shaping of their entire adult lives

How do women create fulfilling lives? This 35-year study of 26 women, randomly selected when they were graduating from college in the early 1970s, explores how they created new forms of identity for themselves. Paths to Fulfillment challenges stereotyped views of women’s lives and shows how work, love and care are all intertwined.

Roots of War
Wanting Power, Seeing Threat, Justifying Force
David G. Winter, University of Michigan

• Provides a comprehensive analysis of the causes of war by analyzing the concepts of power and power motivation
• Incorporates the most recent scholarship on the origins of WWI and the Cuban Missile Crisis
• Compiles a list of reasons given by leaders for starting wars, from Pericles’ exhortation to citizens of Athens in the Peloponnesian War to George W. Bush’s defense of the 2003 invasion of Iraq

Roots of War: Wanting Power, Seeing Threat, Justifying Force identifies three psychological factors that contribute to conflicts and the difference between escalation to war and peaceful resolution: the desire for power (power motivation), exaggerated perception of an opponent’s power threat, and justification for using military power and force. The importance of power concerns in war is reflected in a survey of leaders’ reasons for starting wars from Thucydides through George W. Bush. Drawing on this research, Roots of War concludes by suggesting policies to tame power and preserve peace, demonstrating the role of these policies in successful diplomatic interventions.

Someone To Talk To
Mario Luis Small, Harvard University

Someone To Talk To reveals the often counter-intuitive nature of social support, showing that Americans often take pains to avoid close friends and family— their ‘strong ties’— when deciding on whom to rely. In contrast, they often confide in ‘weak ties,’ as the need for understanding or empathy trumps their fear of misplaced trust. Amid a growing wave of big data and large-scale network analysis, Mario L. Small returns to the basic questions of who we connect with, how, and why, upending decades of conventional wisdom on how we should think about and analyze social networks.

Gender, Sex, and Sexualities
Psychological Perspectives
Edited by Nancy Dess, Occidental College, Jeanne Marecek, Swarthmore College, and Leslie Bell, Private Practice

- Offers a uniquely broad survey of theoretical approaches to the study of gender and sexualities that are of interest to psychologists
- Contributions reflect emerging issues in the study of gender and sexualities
- Features a roster of renowned contributors from around the world

Questions about gender, sex, and sexualities have spurred political, religious, and juridical debates around the world. This book offers readers up-to-date knowledge concerning these matters, as well as tools for critical analysis. Its contributions by leading scholars from around the world will stimulate novel thinking among students and scholars within psychology and related fields.

Socio-Economic Environment and Human Psychology
Social, Ecological, and Cultural Perspectives
Edited by Ayse K. Üsküll, University of Kent and Shigehiro Oishi, University of Virginia

This volume contains a collection of contributions that showcases a variety of approaches to the study of the role of the economic environment in human psychological processes, such as: judgment and decision-making, trust, the self, and happiness. It brings together state-of-the-art research on this topic from psychology, anthropology, economics, epidemiology, and evolutionary science.

The Happy Traveler
Unpacking the Secrets of Better Vacations
Jaime Kurtz, James Madison University

In The Happy Traveler: Unpacking the Secrets of Better Vacations, psychology professor Jaime Kurtz applies the large and ever-growing body of research on happiness and decision-making to enhance the experience of travel. An avid explorer, study abroad instructor, teacher, and happiness researcher, Dr. Kurtz shows how anyone who has a vacation in his or her future can create the most meaningful, fulfilling, and joyful experiences possible.

Supernatural
Death, Meaning, and the Power of the Invisible World
Clay Routledge, North Dakota State University

- Reveals fascinating research pointing to the fact that as people abandon conventional faiths, they become more interested in other supernatural and paranormal ideas
- Argues against the mainstream belief that people are becoming wholly more rational and scientific

Humans – even those who consider themselves secular or atheists – are utterly seduced by supernatural beliefs. Clay Routledge, an experimental social psychologist who grew up in a deeply religious environment, argues that belief or trust in forces beyond our understanding is natural and rooted in our fears of death. In Supernatural: Death, Meaning, and the Power of the Invisible World, Routledge argues that supernatural thinking is adaptive, even healthy, and that it should unite and not divide us.

Understanding Qualitative Research
Evaluating Qualitative Research
Jeasik Cho, University of Wyoming

• Demonstrates a new way of understanding the evaluation of qualitative research
• Includes collected and analyzed review guidelines from many contemporary qualitative research journals used to evaluate the quality of submitted manuscripts
• Evaluates mixed methods research in tandem with qualitative research

Evaluating Qualitative Research explores the theories, practices, and reflections associated with qualitative research. By collating information from websites and qualitative research journals, this book informs readers on a variety of approaches to help them evaluate the quality of qualitative research for their needs.

Philosophies of Qualitative Research
Svend Brinkmann, University of Aalborg

• Shows unique connections between philosophical ideas and qualitative research practices
• Covers the most important philosophical paradigms, such as positivism, realism, phenomenology, hermeneutics, pragmatism, structuralism, and post-structuralism
• Discusses recent ideas related to feminism, indigenous, and post-humanist thought

Philosophies of Qualitative Research helps readers understand, present, and critique the different roles of philosophical paradigms in qualitative research. Author Svend Brinkmann shows how to reflect upon, report, and evaluate the ways in which philosophical positions inform qualitative research as it is currently practiced.

Understanding Qualitative Research
Jacqueline P. Leighton, Centre for Research in Applied Measurement and Evaluation, University of Alberta

• Helps readers understand, present, and critique the different roles of philosophical paradigms in qualitative research
• Helps readers understand, present, and critique the different roles of philosophical paradigms in qualitative research

Understanding Qualitative Research
Lauri L. Hyers, West Chester University

• Offers a comprehensive and thorough account of diary methods within qualitative research
• Particularly helpful for those working on social science and humanities-based projects
• Includes archival and solicited methods

Statistics in Context
Barbara Blatchley, Agnes Scott College

Statistics in Context offers a fresh approach to teaching statistics. Designed to reduce students’ fear of numbers, the text aims to put statistics-wary readers at ease with uncomplicated explanations and practical examples drawn from real research and everyday life. Written in lively, accessible prose, the narrative describes the who, what, when, where, and why, and also the how, of statistics.

The Philosophy of Quantitative Methods
Understanding Statistics
Brian D. Haig, University of Canterbury

The Philosophy of Quantitative Methods undertakes a philosophical examination of a number of important quantitative research methods within the behavioral sciences in order to overcome the non-critical approaches typically provided by textbooks. These research methods are exploratory data analysis, statistical significance testing, Bayesian confirmation theory and statistics, meta-analysis, and exploratory factor analysis. Further readings are provided to extend the reader’s overall understanding of these methods.

Oxford Research Encyclopedia of Psychology
Reference Reimagined

psychoogy.oxfordre.com
Music Therapy Perspectives
Music Therapy Perspectives is an official publication of the American Music Therapy Association, serving both inside and outside the profession of music therapy. Music Therapy Perspectives seeks to promote the development of music therapy clinical practice through the dissemination of scholarly work. Focusing on clinical benefits of music therapy, the journal strives to serve as a resource and forum for music therapists, music therapy students and educators, and those in related professions.

Journal of Music Therapy
Journal of Music Therapy, an official publication of the American Music Therapy Association, is a forum for authoritative articles of current music therapy research and theory, including book reviews and guest editorials. Its mission is to promote scholarly activity in music therapy and to foster the development and understanding of music therapy and music-based interventions. The journal strives to present a variety of research approaches and topics, to promote critical inquiry, and to serve as a resource and forum for researchers, educators, and clinicians in music therapy and related professions.

Archives of Clinical Neuropsychology
Archives of Clinical Neuropsychology, the official journal of the National Academy of Neuropsychology, publishes original contributions dealing with psychological aspects of the etiology, diagnosis, and treatment of disorders arising out of dysfunction of the central nervous system.

Journal of Pediatric Psychology
The Journal of Pediatric Psychology is the scientific publication of the Society of Pediatric Psychology (SPP), Division 54 of the American Psychological Association. The journal publishes articles related to theory, research, and professional practice in pediatric psychology.

Schizophrenia Bulletin
Schizophrenia Bulletin seeks to review recent developments and empirically based hypotheses regarding the etiology and treatment of schizophrenia. We view the field as broad and deep, and will publish new knowledge ranging from the molecular basis to social and cultural factors.

Social Work
Social Work is the premier journal of the social work profession. Widely read by practitioners, faculty, and students, it is the official journal of National Association of Social Work and is provided to all members as a membership benefit. Social Work is dedicated to improving practice and advancing knowledge in social work and social welfare.

Social Work Research
Social Work Research publishes exemplary research to advance the development of knowledge and inform social work practice. The journal includes analytic reviews of research, theoretical articles pertaining to social work research, evaluation studies, and diverse research studies that contribute to knowledge about social work issues and problems.

Health & Social Work
For 20 years, human services professionals have relied on Health & Social Work for the latest advances in areas such as aging, clinical work, long-term care, oncology, substance abuse, depression, and maternal health. Articles also cover research, policy, specialized services, quality assurance, in-service training, and other topics that affect the delivery of health care services.

Children & Schools
Children & Schools publishes professional materials relevant to social work services for children. The journal publishes articles on innovations in practice, interdisciplinary efforts, research, program evaluation, policy, and planning. Topics include student-authority relationships, multiculturalism, early intervention, needs assessment, violence, and ADHD. Children & Schools is a practitioner-to-practitioner resource.
