The titles you love in print, available online…

Very Short Introductions are available on an online resource, via institutional subscription, that offers scholars and students OUP’s premier publishing series in an easily discoverable and highly accessible format. Titles in psychology include introductions to the Psychology of Music, Perception, Clinical Psychology, and Psychotherapy.

Scholarly Research Reviews

Oxford Handbooks Online in Psychology brings together the world’s leading scholars to write review essays that evaluate the current thinking on a field or topic, and make an original argument about the future direction of the debate. Revolutionary changes to the publishing program means that all Oxford Handbooks Online in Psychology, are available online as well as in print. Monthly updates introduce articles in advance of print publication and online-only content ensures the most current, authoritative coverage anywhere.

Reference Reimagined

The Oxford Research Encyclopedia of Psychology is part of a major initiative from Oxford University Press to transform its approach to reference publishing in order to better serve the changing needs of university-level digital research. Through the Oxford Research Encyclopedia (ORE) program, Oxford is building dynamic online encyclopedias in 20+ disciplines that will be continuously updated by the world’s leading scholars, scientists, and researchers.

The Oxford Research Encyclopedia of Psychology is overseen by Oliver Braddick, Emeritus Professor of Psychology at the University of Oxford, and an editorial board of subject experts, ensuring a comprehensive, encyclopedic map of the field. The ORE of Psychology is currently available via subscription as scholarly articles are gradually added to the site.

Clinical Psychology: a very Short Introduction
Author: Essi Viding, University College London

Psychotherapy: A Very Short Introduction
Author: Essi Viding, University College London

Despite the fascination with psychopaths in film, TV, and novels, psychopathy remains widely misunderstood. Most psychopaths are not murderers; most violent criminals are not psychopaths. Separating myth from fact, Essi Viding explores how we identify psychopaths, why they behave and develop the way they do, and whether treatment is possible.

The Power of Positive Parenting
Transforming the Lives of Children, Parents, and Communities Using the Triple P System
Edited by Matthew R. Sanders, University of Queensland, and Trevor G. Mazzucchelli, Curtin University.
The Power of Positive Parenting provides an in-depth description of “Triple P,” one of the most extensively studied parenting programs in the world, backed by more than 30 years of ongoing research. Triple P has its origins in social learning theory and the principles of behavior, cognitive, and affective change, and its aim is to prevent severe behavioral, emotional, and developmental problems in children and adolescents by enhancing the knowledge, skills, and confidence of parents.

Caring for Autism
Practical Advice from a Parent and Physician
Michael A. Ellis, DO, St Francis Hospital
- Written from the unique perspective of a psychiatrist who specializes in Autism Spectrum Disorder (ASD) and father of a child with ASD
- Discusses the effect of ASD on the whole family, not just the patient involved, and the grieving process that comes with it
- Covers diagnosis, medications, treatments, lifestyle, the educational system and legal issues surrounding ASD, including guardianship

As the father of a daughter with ASD and as a trained psychiatrist who specializes in ASD, Dr. Michael A. Ellis provides a holistic view of what comes after diagnosis. In user-friendly tones, he answers the most commonly asked questions about what it’s actually like to live with ASD, what medications and therapies are available, and the global impact it has on the child’s environment.

Unified Protocols for Transdiagnostic Treatment of Emotional Disorders in Children and Adolescents

Therapist Guide
Jill Ehrenreich-May, University of Miami, Sarah M. Kennedy, Children’s Hospital Colorado, Jamie A. Sherman, University of Miami, Emily L. Bilek, University of Michigan, Brian A. Buzzella, VA San Diego’s Family Mental Health Program, Shannon M. Bennett, Weill Cornell Medicine, and David H. Barlow, Boston University

- Features a transdiagnostic model for working with children and adolescents with emotional disorders
- Easy-to-follow, session-by-session organization
- Applicable to a wide group of child and adolescent clients seen in typical practice

The Unified Protocols for Transdiagnostic Treatment of Emotional Disorders in Children and Adolescents suggest that there may be a simple and efficient method of utilizing effective treatment strategies, such as those commonly included in CBT, in a manner that addresses the broad array of emotional disorder symptoms in children and adolescents. The Unified Protocol for children and adolescents comprises a Therapist Guide, as well as two Workbooks, one for children, and one for adolescents. This Therapist Guide, Parent Training for Disruptive Behavior, is designed for therapists to use with parents of children with ASD and challenging behaviors, such as tantrums, noncompliance, and aggression.

In Guns and Suicide, Michael Anestis reframes our perspective on gun violence by shifting the focus to suicide. Guns play a uniquely profound role in American suicide, and Anestis explains how they have this effect—not by making otherwise non-suicidal people want to die, but by facilitating suicide attempts among suicidal individuals.

**Guns and Suicide**
*An American Epidemic*

**Michael D. Anestis**
University of Southern Mississippi

- With rising suicide rates in the U.S., Anestis provides a much-needed understanding of suicide prevention and the critical role of gun control.
- Shifts the conversation about gun violence to suicides by guns, which make up the majority of gun deaths in the U.S.
- Anestis takes a poignant, balanced approach to reducing suicide risk; this is not a book about gun control.

In Guns and Suicide, Michael Anestis reframes our perspective on gun violence by shifting the focus to suicide. Guns play a uniquely profound role in American suicide, and Anestis explains how they have this effect—not by making otherwise non-suicidal people want to die, but by facilitating suicide attempts among suicidal individuals.

**Innovations in Psychosocial Interventions and Their Delivery**
*Leveraging Cutting-Edge Science to Improve the World’s Mental Health*

**Alan E. Kazdin**
Yale University

- Explores ways of addressing psychosocial dysfunction on a global scale.
- Draws on the latest scientific advances in psychology, psychiatry, public health, and other fields.
- Provides detailed information on the challenges and opportunities presented by innovative approaches to mental health care.

Drawing on diverse fields such as public health, business, entertainment, social policy and law, and other domains that may inform efforts to deliver interventions more effectively, Alan Kazdin explores an assortment of novel and innovative ways to address the world’s mental health crisis.

**NEW EDITION**
*Systems of Psychotherapy*
*A Transtheoretical Analysis*

**James O. Prochaska**
University of Rhode Island, and **John C. Norcross**
University of Scranton

- Presents numerous case studies within each psychotherapy system.
- Provides unique perspectives on the limitations of each system of psychotherapy.
- Explores the complexity and diversity of the leading theories of psychotherapy.

Comprehensive, systematic, and balanced, Systems of Psychotherapy uses a wealth of clinical case illustrations to help readers understand a wide variety of psychotherapies—including psychoanalytic, psychodynamic, existential, person-centered, experiential, interpersonal, exposure, behavioral, cognitive, systemic, multicultural, and integrative.

**Contemporary Health Issues on Marijuana**
*Edited by Ken C. Winters, Oregon Research Institute, and Kevin A. Sabet, Yale University*

- Authored by a multidisciplinary group of experts from the fields of psychology, epidemiology, medicine, and criminal justice, chapters comprehensively review numerous research domains of public health interest with respect to marijuana use, including the drug’s impact on cognitive and neurological functioning, treatment approaches for cannabis use disorders, the effects of marijuana smoking on lung function, and marijuana-impaired driving.

**Change**
*What Really Leads to Lasting Personal Transformation*

**Jeffrey A. Kottler**
California State University – Fullerton

Today, psychologists and therapists who sit with clients session after session have a unique window into the human psyche, watching the rhythms of change unfold in front of them every day, and yet the process remains a mystery. Research has shown that even in cases of unqualified success, the client and the therapist often have wildly different views on what made it work. Taking that as his starting point, Jeffrey Kottler leads the reader on an exploration of human behavior, seeking to find out what it is that really makes a difference that can lead to transformative and lasting change.
CLINICAL PSYCHOLOGY

Positive Psychotherapy

Clinician Manual
Tayyab Rashid, University of Toronto; Scarborough, and Martin P. Seligman, University of Pennsylvania
• Provides therapists with a session-by-session therapeutic approach based on the principles of positive psychology
• Contains 15 positive psychotherapy sessions, each complete with core concepts, guidelines, skills, and worksheets for practicing skills learned in session
• Explores character strengths and positive psychology practices, processes, and mechanisms of change
This clinician’s manual begins with an overview of the theoretical framework for positive psychotherapy, exploring character strengths and positive psychology practices, processes, and mechanisms of change.

The Politics of Autism

Bryna Siegel, Autism Center of Northern California
• All drawn from data—readers explore unabashed contrarian views on autism epidemiology, autism service provision, autism education, and autism research
• New viewpoints on ‘old’ issues: Is there more autism? What’s wrong with how autism gets diagnosed? Are standard treatments really the best way to treat the different forms of the life course of people with autism? Why does fear of vaccines persist? Are we effectively allocating autism research dollars if the goal is to help people with autism?
• Points out the current weaknesses in the American system pertaining to autism and behavioral disabilities and suggests solutions and programs that can help strengthen support
The Politics of Autism explores controversies in autism epidemiology, problems in effective autism education, motivators of the alternative medicine and anti-vaccine movement in autism, and argues for the re-examination of autism research priorities from basic science to clinical studies aimed at improving lives of individuals and their families living with autism.

Post-Traumatic Stress Disorder

Edited by Charles B. Nemeroff, University of Miami Miller School of Medicine, and Charles Marmar, New York University
This volume brings together the leaders in the field of PTSD research to present an up-to-date summary and understanding of this complex disorder. All of our current knowledge and controversies concerning the diagnosis, epidemiology, course, pathophysiology and treatment are described in detail. The evidence for efficacy for each of the different forms of psychotherapy and pharmacotherapy is reviewed.

Headcase

LGBTQ Writers and Artists on Mental Health and Wellness
Edited by Stephanie Schroeder, and Teresa Theophano, Services and Advocacy for GLBT Elders (SAGE)
Headcase illustrates the intersection of mental wellness, illness, and LGBTQ identity, as well as the lasting impact of historical views deeming that to be gay or lesbian equated mental illness. The collection of pieces contained therein offer personal views from both providers and clients, often one and the same, talking about their experiences. The text breaks new ground in documenting issues in LGBTQ mental health care with superbly written and powerfully rendered personal and political stories and images.

Psychotherapy Relationships that Work

Third Edition

Edited by John C. Norcross, University of Scranton, Michael J. Lambert, Brigham Young University

The definitive, evidence-based book on the psychotherapy relationship: what works in general (volume 1) and what works for particular patients (volume 2). Each chapter presents definitions, clinical examples, landmark studies, comprehensive meta-analyses, diversity considerations, training implications, and ends with bulleted clinical practices. The third edition features expanded coverage and updated reviews with an enhanced practice focus.

COLLABORATIVE PSYCHOLOGY

Consciousness

A Very Short Introduction

Second Edition

Susan Blackmore, University of Plymouth

Some of our most burning questions surround consciousness: What creates our identity? Do we really have free will? Is consciousness itself an illusion? The rapid rate of developments in brain science continues to open up debate on these issues. This book clarifies the complex arguments and illuminates the major theories on consciousness.

Very Short Introductions

978-0-19-879473-8 | PB | 168pp | £8.99

Identity

A Very Short Introduction

Florian Coulmas, Duisburg-Essen University

'Identity' as a concept has many faces, and its very versatility in different contexts, can make it hard to define. Florian Coulmas discusses the many meanings of this slippery concept, considering why individual and collective identities are important to us, and discussing the problems asserting individual identities can create.

Very Short Introductions

978-0-19-828354-8 | PB | 168pp | £8.99

Mirror-Touch Synaesthesia

Thresholds of Empathy with Art

Edited by Daria Martin, University of Oxford

People with mirror-touch synaesthesia feel a physical sense of touch on their own bodies when they witness touch to other people and often to objects. This book brings together essays and conversations by prominent neuroscientists, anthropologists, artists, art theorists, curators, film theorists, and philosophers, to explore this phenomenon.

978-0-19-876928-6 | PB | 400pp | £30.00

Collaborative Remembering

Theories, Research, and Applications

Edited by Michelle L. Meade, Montana State University, and Celia B. Harris. Penny Van Bergen. John Sutton, and Amanda J. Barnier, all at Macquarie University

We remember in social contexts. We reminisce about the past together, collaborate to remember shared experiences, and remember in the context of our communities and cultures. This book explores the topic of collaborative remembering across a wide range of fields, including developmental, cognitive, and social psychology.

UK: Dec 2017 / US: Jan 2018

NEW IN PAPERBACK

Aesthetics and the Sciences of Mind

Edited by Greg Currie, University of York, Matthew Kieran, and Aaron Meskin, both at University of Leeds, and Jon Robson, University of Nottingham

How far should philosophical accounts of the value and interpretation of art be sensitive to the scientific approaches used by psychologists, sociologists, and evolutionary thinkers? A team of experts urge different answers to this question, and explore how empirical inquiry can shed light on problems traditionally regarded as philosophical.

UK: Jan 2018 / US: Feb 2018

NEW EDITION

The Rise of Homo Sapiens

The Evolution of Modern Thinking

Second Edition

Frederick L. Coolidge and Thomas Wynn. Both at University of Colorado

The Rise of Homo Aupens is an introduction to human cognitive evolution written by psychologist Frederick L. Coolidge and archaeologist Thomas Wynn. The text differs from other treatments of cognitive evolution in its reliance on the archaeological record, and its emphasis on working memory, the most thoroughly investigated cognitive model of the last half-century.

NEW IN PAPERBACK

Understanding Vision
Theory, Models, and Data
Li Zhaoping
University College London
Vision science has grown hugely in the past decades, but there have been few books showing readers how to adopt a computational approach to understanding visual perception, along with the underlying mechanisms in the brain. This book explains the computational principles and models of biological visual processing, and in particular, primate vision.

Sizing up Consciousness
Towards an Objective Measure of the Capacity for Experience
Marcello Massimini, University of Milan, Giulio Tononi, University of Wisconsin – Madison School of Medicine
Translator: Frances Andersen
This book explores how we can measure consciousness. It clarifies what consciousness is, how it can be generated from a physical system, and how it can be measured. It also shows how conscious states can be expressed mathematically and how precise predictions can be made using data from neurophysiological studies.

COGNITIVE PSYCHOLOGY

OXFORD LIBRARY OF PSYCHOLOGY

The Oxford Handbook of Spontaneous Thought
Mind-Wandering, Creativity, and Dreaming
Edited by Kieran C.R. Fox, Stanford University, and Kalina Christoff, University of British Columbia
This Handbook is the first of its kind to bring together views from neuroscience, psychology, philosophy, phenomenology, history, education, contemplative traditions, and clinical practice to explore the ubiquitous but poorly understood mental phenomena that we collectively call ‘spontaneous thought,’ including mind-wandering, daydreaming, insight, creative thinking, and dreaming.

The Oxford Handbook of 4E Cognition
Edited by Albert Newen, Ruhr-University Bochum, Leon De Bruin, Radboud University, and Shaun Gallagher, University of Memphis
4E cognition (embodied, embedded, enactive, and extended) assumes that cognition is shaped and structured by dynamic interactions between the brain, body, and both the physical and social environments. With essays from leading scholars and researchers, The Oxford Handbook of 4E Cognition is the definitive work on this burgeoning field.

The Oxford Library of Psychology
978-0-19-873541-0 | HB | 960pp | £125/$165
Available as an Ebook | Available in Oxford Handbooks Online

The Oxford Handbook of Adult Cognitive Disorders
Edited by Michael L. Alosco, Boston University, and Robert A. Stern, Boston University School of Medicine
The Oxford Handbook of Adult Cognitive Disorders is an up-to-date, scholarly, and comprehensive volume that covers most diseases, conditions, and injuries resulting in impairments in cognitive function in adults. The Handbook is appropriate for both clinicians and clinical researchers, from advanced trainees to seasoned professionals.

The Aesthetic Animal
Henrik Hogh-Olesen, Aarhus University
• Examines what drives the aesthetic impulse in humans
• Illuminates what makes us decorate our surroundings and ourselves
• Reveals why we paint, sing, dance, compose, and perform music
The Aesthetic Animal answers the ultimate questions of why we adorn ourselves, embellish our things and surroundings, and produce art, music, song, dance and fiction. This must-read presents an original and comprehensive synthesis of the empirical field, synthesizing data from archeology, cave art, anthropology, biology, evolutionary psychology and neuro-aesthetics.

The Aesthetic Animal
UK: Aug 2018 / US: Sep 2018
978-0-19-872579-2 | HB | 192pp | £22.99/$35
Available as an Ebook | Available in Oxford Scholarship Online

Perception: A Multisensory Perspective
Nicola Bruno, Università di Parma, and Francesco Pavani, Università di Trento
This book adopts a multisensory approach to understanding perception. Within it, the authors define perception as intrinsically multisensory from the start and examine multisensory interactions as the key process behind how we perceive our own body, control its movements, and perceive and recognize objects, space, and time.

Perception: A Multisensory Perspective

The Oxford Handbook of Taboo Words and Language
Edited by Keith Allan, Monash University
This volume brings together experts from a wide range of disciplines to define and describe taboo words and language and to investigate the reasons and beliefs behind them. It examines topics such as impoliteness, swearing, censorship, taboo in deaf communities, translation of tabooed words, and the use of taboo in banter and comedy.

NEW IN PAPERBACK
LSD
My Problem Child
Albert Hofmann
Albert Hofmann, who died in 2008 aged 102, synthesised LSD in 1938. Although his work produced other important drugs, it was LSD that shaped his career. Shortly before his death, Hofmann approved a new and updated translation of his autobiography (first published by McGraw Hill in 1979). It appears here for the first time in print.

NEW IN PAPERBACK
How Art Works
A Psychological Exploration
Ellen Winner, Boston College
• The first book to illuminate art through philosophical and psychological approaches
• Examines explicit philosophical questions about the arts and their surprising answers
• Reveals how social scientists have investigated art and uncovers paths for exploration
This book examines puzzles about the arts wherever their provenance - as long as there is empirical research using the methods of social science (interviews, experimentation, data collection, statistical analysis) that can shed light on these questions. The examined research reveals how ordinary people think about these questions, and why they think the way they do - an inquiry referred to as intuitive aesthetics.

Art, Aesthetics, and the Brain
Edited by Joseph P. Huston, University of Duiseldorf, Marcos Nadal, University of Vienna, Francisco Mora, Universidad Complutense, Luigi F. Agnati, University of Modena, Italy, and Camilo José Cela Conde, University of the Balearic Islands
• Brings together work by researchers from diverse disciplines, providing the reader with multiple perspectives
• Includes full sections on visual arts, music and dance, avoiding the traditional and unjustified focus strictly on painting
• The contributors are renowned researchers in the field of the cognitive neuroscience of art and aesthetics
What neural processes underlie the appreciation of painting, music, and dance? How did such processes evolve? This book brings together experts in genetics, psychology, neuroimaging, neuropsychology, art history, and philosophy to explore these questions. It sets the stage for a cognitive neuroscience of art and aesthetics.

COGNITIVE PSYCHOLOGY

NEW IN PAPERBACK
SUCCESSFUL AGING
Better With Age
The Psychology of Successful Aging
Alan D. Castel, University of California, Los Angeles
• Highlights how old age is not all downhill by illustrating the paradoxes and pleasures of old age, and new research about successful aging
• Features personal interviews and insights from Maya Angelou, Bob Newhart, Jared Diamond, John Glenn, and John Wooden
• Shows what activities one can do to age well, how attitudes and expectations about aging are linked to how we age, and ways to enjoy older age
Better with Age is about how our beliefs, behaviors, and expectations influence how well we age. This book presents the paradoxes and pleasures of old age, new research and personal interviews with famous role models of successful aging, and what we can do now to enjoy old age.
978-0-19-027998-1 | HB | 256pp £18.99/$27.95

OXFORD HANDBOOKS

The Oxford Handbook of Lying
Edited by Jörg Meibauer, Johannes Gutenberg University
This Handbook brings together past and current research on all aspects of lying and deception, from the combined perspectives of linguistics, philosophy, and psychology. It will be an essential reference for students and researchers in these fields and will contribute to establishing the vibrant new field of interdisciplinary lying research.

When Fiction Feels Real
Representation and the Reading Mind
Elaine Auyoung
University of Minnesota
When Fiction Feels Real offers a new approach to the phenomenology of reading by engaging with psychological research on reading and cognition. Focusing on the work of Jane Austen, Charles Dickens, George Eliot, Leo Tolstoy, and Thomas Hardy, Elaine Auyoung demonstrates what nineteenth-century writers know about the pleasure of literary experience.

Conflict
How Soldiers Make Impossible Decisions
Neil D. Shortland
University of Massachusetts Lowell, Laurence J. Alison, University of Liverpool, and Joseph M. Moran, Harvard University
• Provides an understanding of the psychology behind military decision making
• Presents a series of least-worst decisions faced by individuals across all levels of command
• Ensures that the psychological analysis of decision making does not lose its grounding in reality
Conflict: How Soldiers Make Impossible Decisions is about making hard choices—where all outcomes are potentially negative. The authors draw on interviews conducted with soldiers about the situations they faced and the decisions they made in war. These vivid and sometimes distressing stories allow the authors to explore the cognitive processes associated with choice, goal-directed thinking, innovation, and courage.

Possessed
Why We Want More Than We Need
Bruce Hood
Bristol University
• A highly readable account of our drive to acquire possessions
• A revealing view of ownership that sheds light on the growing political turmoil sweeping Western democracies
• A creative synergy of psychology, biology, history, economics and politics
Possessed is the first accessible book to consider the psychological origins and future of ownership in a rapidly changing world. It reveals how we are compelled to accumulate possessions in a relentless drive to seek status and approval by signaling our values to others by what we own. It traces the history of ownership but looks to the future as our drive to own will need to adapt to environmental and technological change.

Squeezing Minds From Stones
Cognitive Archaeology and the Evolution of the Human Mind
Edited by Karenleigh A. Overmann, University of Bergen, and Frederick L. Coolidge, University of Colorado, Colorado Springs
This book is a collection of essays from early pioneers in the field like archaeologists Thomas Wynn and Iain Davidson and evolutionary primatologist William McGrew, to up and coming newcomers like Shelby Putt, Ceri Shipton, Mark Moore, James Cole, Natalie Uomini, and Lana Ruck. Their essays address a wide variety of cognitive archaeology topics, including the value of experimental archaeology, primate archaeology, the intent of ancient tool makers, and how they may have lived and thought.

COGNITIVE PSYCHOLOGY
The Mismatch Negativity
A Window to the Brain
Risto Näätänen, University of Trier, Teja Rajapaksa, University of Helsinki, and Gregory Light, University of California, San Diego

The mismatch negativity (MMN) is the electrophysiological change-detection response of the brain, stimulated by discernible change to a repetitive sequence of sound. MMN has become a popular tool for studying perceptual, memory, and learning functions. This book provides an introduction to MMN and its contribution within different clinical fields.

Genes, Brains, and Emotions
Interdisciplinary and Translational Perspectives
Edited by Andrei C. Miu, Babes-Bolyai University, Judith R. Homberg, Radboud University, and Klaus-Peter Lesch, University of Würzburg

The study of emotions has rapidly expanded in recent decades, incorporating interdisciplinary research on the genetic underpinnings and neural mechanisms of emotion. This book offers a comprehensive account of this interdisciplinary field of research, bridging psychology, genetics, and neuroscience.

Brains As Engines of Association
An Operating Principle for Nervous Systems
Dale Purves, Duke University

Brains As Engines of Association unravels how human brains operate. Based on evidence from vision, audition, speech and music, Purves argues that brains function wholly on the basis of trial and error experience that has been encoded in neural circuits over evolutionary and individual time. The theory presents a challenge to all neuroscientists.

Banned Emotions
How Metaphors Can Shape What People Feel
Laura Otis, Emory University

Banned Emotions, written by neuroscientist-turned-literary scholar Laura Otis, draws on the latest research in neuroscience and psychology to challenge popular attempts to suppress certain emotions. Examining works by Dante, Dickens, Dostoievsky, Kafka, Forster, and Woolf in parallel with Anorexia, Fatal Attraction, and Who Moved My Cheese?, Otis traces pervasive patterns in the ways emotions are represented that can make people so ashamed of their feelings, they may stifle emotions they need to work through.

The Brain from Inside Out
Gyorgy Buzsáki, New York University

Gyorgy Buzsáki’s The Brain from Inside Out examines why the outside-in framework for understanding brain function have become stagnant and points to new directions for understanding neural function. Building upon the success of Rhythms of the Brain, Professor Buzsáki presents the brain as a foretelling device that interacts with its environment through action and the and the examination of action’s consequence.

PSYCHOLOGY ONLINE PRODUCTS FROM OXFORD UNIVERSITY PRESS

Finger: Franz Joseph Gall
Stanley Finger, Washington University, and Paul Eling, Radboud University

Franz Joseph Gall, a dedicated physician and scientist, is unfortunately most remembered for his controversial doctrine that would become known as phrenology. Although often portrayed as a discredited buffoon who believed he could assess a person’s strengths and weaknesses by measuring cranial bumps, Gall strove to answer pressing questions about the mind, brain, and behavior. This work presents a fresh look at Gall, both his life and seminal ideas, some of which—for example, cortical localization of function—would become tenets of modern behavioral neuroscience.

**Neuropsychological Evaluation of the Child**

*Domains, Methods, and Case Studies*

**SECOND EDITION**

Ida Sue Baron

- A unique and practical edition that compiles published and unpublished normative data for individual neuropsychological tests in one resource/reference text
- Reviews basic skills required for history taking, administration, interpretation, and communication of results
- Addresses critical topics in neuropsychology and neurology in domain-specific chapters

This updated and expanded edition retains a practical developmental and lifespan perspective for neuropsychological case formulation. Chapters cover the current status, clinical issues, and essential domains and techniques in clinical neuropsychological practice and research, and include case vignettes that explicate brain-behavior relationships in youth from preschool-age through adolescence with medical disease or psychological disorder.

**The Oxford Handbook of Music Psychology**

*SECOND EDITION*

Edited by Susan Hallam, University College London, Ian Cross, University of Cambridge, and Michael Thaut, Colorado State University

- A new and updated edition of a landmark text in the field of music psychology, providing a broad overview of this rapidly growing field of research
- Includes a range of international experts in this field - both as section editors and chapter authors, resulting in a volume which presents the best work currently being done in the field
- No equivalent volume exists in the field of music psychology, making this a ‘must-have’ book for those seeking the broadest possible overview of the field

The second edition of *The Oxford Handbook of Music Psychology* updates the original landmark text, providing a comprehensive review of the latest developments in this fast growing area of research. With contributions from internationally recognised experts, it is an essential resource for students and researchers in psychology.

**UK: Dec 2017 / US: Jan 2018**

Why Children Follow Rules
Legal Socialization and the Development of Legitimacy
Tom R. Tyler, Yale University, and Rick Trinkner, Arizona State University

Why Children Follow Rules focuses on the process by which children and adolescents develop their orientation toward the law. Drawing on law, psychology, sociology, and criminology, Tom Tyler and Rick Trinkner review the literature on socialization with a particular focus on families, schools, and the juvenile justice to reveal a fundamental conflict about how authority and power should be exercised in essential social institutions.

The Roots of Modern Psychology and Law
A Narrative History
Edited by Thomas Grisso, University of Massachusetts Medical School, and Stanley L. Brodsky, The University of Alabama

The Roots of Modern Psychology and Law: A Narrative History reveals how the field developed during the first decade following the founding of the American Psychology-Law Society. The contributors to this edited volume, widely considered to be among the “founders” of the field, were responsible for establishing and nurturing many of the subfields and topics in psychology and law or forensic psychology that flourished across the next fifty years.

Assessing Negative Response Bias in Competency to Stand Trial Evaluations

Steven J. Rubenzer, Forensic Sobriety Assessment, LLC

Assessing Negative Response Bias in Competency to Stand Trial Evaluations provides readers with a comprehensive guide to assessing whether a defendant has feigned mental impairment during a competency to stand trial evaluation, or simply did not put forth his/her best effort. This book reviews the literature on assessing feigning and negative response bias, with particular focus on issues, tests, and data relevant to CST evaluations, and examines proposed criteria and statistical methods of determining and classifying assessment results.

Objection

**Disgust, Morality, and the Law**

Debra Lieberman
University of Miami

and Carlton Patrick
University of Central Florida

- Sets forth a novel psychological explanation for why the emotion of disgust and our sense of morality are deeply intertwined

- Authors argue for why disgust should not be used as a criterion for lawmaking

- Opens up the debate for whether or not certain behaviors can be deemed “wrong” absent of a gut feeling that they are “gross” or “offensive”

In Objection, psychologists Debra Lieberman and Carlton Patrick examine disgust and its impact on the legal system to show why the things that we find stomach-turning so often become the things that we render unlawful.

Cultural Constructions of Identity
Metaphenotropy and Theory
Edited by Luis Urrieta, Jr., The University of Texas at Austin, and George W. Noblit, The University of North Carolina at Chapel Hill
Cultural Constructions of Identity initiates the effort to allow for qualitative and ethnographic studies to speak to identity theory, collectively. Further, while the studies synthesized in this book look at various intersections of race and ethnicity with respect to gender, age, class, and sexuality, Urrieta and Noblit implore readers to consider what these studies reveal about identity and identification theory itself.

A comprehensive guide to the choices, controversies, and decisions faced by parents and educators.

Twice Exceptional: Supporting and Educating Bright and Creative Students with Learning Difficulties

This fully-updated second edition provides recommendations for a multi-tiered approach to school absenteeism that concentrates on prevention (Tier 1), early intervention for emerging cases (Tier 2), and more extensive intervention and systemic strategies for severe cases (Tier 3), with each tier based on empirically supported strategies grounded in scientific research.

The Child's Curriculum

Working with the Natural Values of Young Children

All children are born with emotional talent, if left untended, those talents can wane during the first five years of life. The book focuses on children's readiness for learning. It addresses the natural joy explicit in children's early conversations and attempts to understand how it works, and the exciting research surrounding dyslexia, considering potential causes, the neuroscience behind it and attempts to understand how it works, and the various strategies and interventions which can help people with dyslexia today.

Evidence-Based Practices in Deaf Education
Edited by Harry Koons, Radboud University Nijmegen, and Marc Marschark, Rochester Institute of Technology.
This volume presents the latest research from internationally recognized researchers and practitioners on language, literacy and numeracy, cognition, and social and emotional development of deaf learners. The volume addresses how we can improve outcomes of deaf education through professional development of teachers, the construction and implementation of evidence-based teaching practices, and consideration of “the whole child,” thus emphasizing the importance of integrative, interdisciplinary approaches.

Deaf Education Beyond the Western World
Context, Challenges, and Prospects
Edited by Harry Koons, Radboud University Nijmegen, Maria Brons, Kentals International Foundation, and Marc Marschark, Rochester Institute of Technology.
This volume encourages more researchers in more countries to continue investigating the learning environment of deaf learners, based on the premise of leaving no one behind. Featuring chapters centering on 19 countries, from Africa, Asia, Latin America, and Central and Eastern Europe, the volume offers a picture of deaf education from the perspectives of local scholars and teachers who demonstrate best practices and challenges within their respective regional contexts.

Introduction to School Psychology
Controversies and Current Practice
Edited by Matthew K. Burns, University of Missouri.
- Provides a deeper understanding of current practice and facilitates critical thinking
- Traces historical and current controversies in the field
- Focuses on contexts and the future of school psychology with commentaries from early-career scholars
This book serves as an introduction to the field of school psychology. School psychology has evolved over the course of its existence due to several controversies, and how researchers and practitioners responded to those controversies. This text presents those debates and provides needed historical context to explain the field and facilitate deeper understanding in students.

Handbook of Behavioral Interventions in Schools
Multi-Tiered Systems of Support
Edited by Keith C. Radley, and Evan H. Dart, both at University of Southern Mississippi.
This book is a complete guide to establishing a multi-tiered system of supports to address student behavior in the classroom and other school settings. The book will walk trainees and practitioners through the entire process of assessment of problem behaviors to intervention and progress monitoring.

Handbook of Co-Enrollment in Deaf Education
Edited by Marc Marschark, Rochester Institute of Technology, Shirin Antia, University of Arizona, and Harry Koons, Radboud University Nijmegen.
Co-enrollment programming shows great promise, however, research concerning co-enrollment programming for DHH learners is still in its infancy. This volume sheds light on this potentially groundbreaking method of education, providing descriptions of 14 co-enrollment programs from around the world, explaining their origins, functioning, and available outcomes.

Handbook of Evidence-Based Practices in Deaf Education
Edited by Colette T. Dollarhide, The Ohio State University, and Matthew E. Lemberger-Truelove, University of New Mexico.
Theories of School Counseling Delivery for the 21st Century provides a compilation of contemporary and cutting-edge theories to inform the way school counselors practice the art and science of school counseling. The text—written by theory experts—offers tremendous insight into each, thereby helping readers to (a) select a favorite theory, and (b) learn to incorporate theoretical flexibility in school counseling.

Bullying, School Violence, and Climate in Evolving Contexts
Culture, Organization, and Time
Ron Avi Astor, University of Southern California, and Rami Benbenishty, Bar Ilan University.
Bullying, School Violence, and Climate in Evolving Contexts outlines a novel unifying model that brings together previously distinct literatures on a wide range of issues. Drawing from numerous large-scale research studies from around the globe, the authors examine the theoretical foundations of school safety and bullying and propose a series of groundbreaking new theoretical and practice proposals.

The Surprising Science of Meetings
How You Can Lead your Team to Peak Performance
Steven G. Rogelberg, University of North Carolina at Charlotte

- Synthesizes the latest research from management and behavioral science to provide the best plan for managers who lead meetings
- Explains how to get the most out of meetings while reducing wasted time
- Makes the case that simple changes, such as tweaking the length of meetings, can have real impact

In The Surprising Science of Meetings, Steven G. Rogelberg draws from extensive research, analytics and data mining, and survey interviews to share the proven techniques that help managers and employees change the way they run meetings and upgrade the quality of their working hours.

Talent Without Borders
Global Talent Acquisition for Competitive Advantage
Robert E. Ployhart, University of South Carolina, Jeff A. Weekley, University of Texas at Dallas, and Julian Dalzell, University of South Carolina

Talent Without Borders offers a practical approach to help managers think about acquiring talent globally. With explicit consideration of real-world issues that influence the implementation of global staffing solutions, the book shows managers how to use analytics and data to enable evidence-based decisions. Emphasizing national culture, strategy, and competitive advantage, it considers the entire talent life cycle, from attraction through retention.

On Romantic Love
Simple Truths about a Complex Emotion
Berit Brogaard
University of Missouri, St. Louis

The psychoanalysis of sense shows that Deleuze was not merely aware of the debates animating the Lacanian School during the 1960s: he sought to contribute to them. It offers a new, integrated reading of Deleuze’s The Logic of Sense (1969) by understanding it as a ‘psychoanalysis of sense’.

Plateaus New Directions in Deleuze Studies
Rick Anthony Furtak
Concordia College

In Knowing Emotions, Furtak argues that it is only through the emotions that we can perceive meaning in life, and only by feeling emotions that we are able to recognize the value or significance of anything whatsoever. Our affective responses and dispositions therefore play a critical role in human existence, and their felt quality is intimately related to the awareness they provide.

Belief
A Pragmatic Picture
Aaron Z. Zimmerman
University of California, Santa Barbara

Aaron Zimmerman presents a new pragmatist account of belief, in terms of information poised to guide our more attentive, controlled actions. And he explores the consequences of this account for our understanding of the relation between psychology and philosophy, the mind and brain, the nature of delusion, faith, pretense, racism, and more.

Regard for Reason in the Moral Mind
Joshua May
University of Alabama

The burgeoning science of ethics has fostered pessimism about moral thought and action: we’re told that they are driven by arbitrary factors and unreasoned feelings. Joshua May argues compellingly that this pessimism is not justified: moral judgment and motivation are fundamentally rational and always controllable emotion, while explaining some of the neuroscience underlying our wildest passions.

The Implicit Mind
Cognitive Architecture, the Self and Ethics
Michael Brownstein
John Jay College of Criminal Justice, City University of New York

The central contention of The Implicit Mind is that understanding the two faces of spontaneity—its virtues and vices—requires understanding the ‘implicit mind.’ In turn, Michael Brownstein maintains that understanding the implicit mind requires the consideration of three sets of questions. First, what are implicit mental states? What kind of cognitive structure do they have? Second, how should we relate to our implicit attitudes? Are we responsible for them? Third, how can we improve the ethics of our implicit minds?

Self-Consciousness and “Split” Brains
The Minds’ I
Elizabeth Schechter
Washington University, St Louis

Elizabeth Schechter explores the implications of the experience of people who have had the pathway between the two hemispheres of their brain severed, and argues that there are in fact two minds, subjects of experience, and intentional agents inside each split-brain human being: right and left. But each split-brain subject is still one of us.

What It Is Like To Perceive
Direct Realism and the Phenomenal Character of Perception
J. Christopher Maloney
University of Arizona

Thought, including conscious perception, is representation. But perceptual representation is uniquely direct, permitting immediate acquaintance with the world and ensuring perception’s distinctive phenomenal character. The perceptive mind is extended. It recruits the very objects perceived to constitute self-referential representations determinative of what it is like to perceive.

Representation in Cognitive Science
Nicholas Shea, University of London.
How can we think about things in the outside world? There is still no widely accepted theory of how mental representations get their meaning. In light of pioneering research, Nicholas Shea develops a naturalistic account of the nature of mental representation with a firm focus on the subpersonal representations that pervade the cognitive sciences.

Inner Speech
New Voices
Edited by Peter Langland-Hassan, University of Cincinnati, and Agustín Vicente, University of the Basque Country.
Inner Speech focuses on a familiar and yet mysterious element of our daily lives. In light of renewed interest in the general connections between thought, language, and consciousness, this anthology develops a number of important new theories about internal voices and raises questions about their nature and cognitive functions.

Available as an Ebook | Available in Oxford Scholarship Online

The First Minds: Caterpillars, Karyotes, and Consciousness
Arthur S. Reber, University of British Columbia.
- The first effort to show that sentience begins with single-celled prokaryotes like bacteria
- Challenges the idea that consciousness is unique to humans
- Explores old models full of philosophical, empirical, and evolutionary biological problems

The Cellular Basis of Consciousness theory places the first appearance of sentience at the emergence of life. It makes the radical, and previously unexplored, claim that prokaryotes, or bacteria, possess a primitive form of consciousness. The implications of the theory for the philosophy of mind, cell-biology, and cognitive neurosciences are explored.

Thomas Szasz
An Appraisal of His Legacy
Edited by C.V. Haldipur, and James L. Knoll IV both at SUNY Upstate Medical University, and Eric v.d. Luft, Gegensatz Press

- Insanity Defence - the book examines the concept and his criticism both from an historical and philosophical perspective
- Concept of Mental illness - questioning the concept of mental illness is central to much of Szasz's work. This book examines the concept in depth
- Suicide - the matter of suicide has been debated not only by physicians but also by legislators the world over. The book contributes to the debate by examining the issue from various perspectives.

Thomas Szasz wrote over thirty books and several hundred articles, replete with mordant criticism of psychiatry. His works made him arguably one of the world's most recognized psychiatrists, albeit one of the most controversial. This book critically examines the legacy of a man who challenged the very concept of mental illness.

Madness and the Demand for Recognition
A Philosophical Inquiry into Identity and Mental Health Activism
Mohammed Abouelleil Rashed, University of London, Kings College London
- The first comprehensive philosophical examination of the claims and demands of Mad activism
- Engages with a diverse set of disciplines and literatures: philosophy of psychiatry, Mad studies, Disability studies, activist literature, and philosophical literature on identity and recognition
- Develops a theoretical framework for identity and recognition that draws on Georg Hegel, Immanuel Kant, and the work of Charles Taylor, Axel Honneth, Nancy Fraser, Kwame Appiah, and Richard Rorty

Developments in mental health activism pose a radical challenge to psychiatric and societal understandings of madness. Mad Pride and mad-positive activism reject the language of mental illness and disorder and demand recognition of madness as grounds for identity. This book examines and responds to the claims and demands of Mad activism.

PHILOSOPHY & MIND

Brain-Mind
From Neurons to Consciousness and Creativity
Paul Thagard
University of Waterloo

- Clearly written with no previous background in neuroscience or psychology needed
- Draws on exciting new ideas in theoretical neuroscience
- Explains the most challenging mental operations, right up to consciousness and creativity

Paul Thagard's Brain-Mind presents a unified, brain-based theory of cognition and emotion with applications to the most complex kinds of thinking, right up to consciousness and creativity. Neural mechanisms are used to explain mental operations for analogy, action, intention, language, and the self.

978-0-19-067871-5 | HB | 320pp £32.99/$49.95
Available as an Ebook | Available in Oxford Scholarship Online

Natural Philosophy
From Social Brains to Knowledge, Reality, Morality, and Beauty
Paul Thagard
University of Waterloo

- Clearly written; no previous background in philosophy, neuroscience, or psychology needed
- Draws on exciting new ideas in theoretical neuroscience
- Comprehensive examination of epistemology, metaphysics, ethics, and aesthetics

Paul Thagard uses new accounts of brain mechanisms and social interactions to forge theories of mind, knowledge, reality, morality, justice, meaning, and the arts. Natural Philosophy brings new methods for analyzing concepts, understanding values, and achieving coherence. It shows how to unify the humanities with the cognitive and social sciences.

Mind-Society
From Brains to Social Sciences and Professions
Paul Thagard
University of Waterloo

- Clearly written; no previous background in neuroscience, psychology, or social science needed
- Draws on exciting new ideas in theoretical neuroscience
- Comprehensive application of brain mechanisms across the social sciences and professions

Paul Thagard systematically connects neural and psychological explanations of mind with major social sciences (social psychology, sociology, politics, economics, anthropology, and history) and professions (medicine, law, education, engineering, and business). Social change emerges from interacting social and mental mechanisms.

The Tao of Ordinariness
Humility and Simplicity in a Narcissistic Age
Robert J. Wicks
Loyola Maryland University

- Written in Wicks's trademark style, the book is short, engaging, and a pleasure to read despite its contrarian view
- Offers an argument in favor of humility and authenticity at a time when narcissism is rampant in politics, entertainment, and sports
- Includes a chapter on simplicity during a time when life seems so complex

The Tao of Ordinariness is an invitation to come home to your authentic self in a world now clearly mesmerized by “spin,” narcissism, fantasy, and exhibitionism. The book offers an alternative to our pressures to measure our self-worth by numbers of likes and followers, living in a constant state of “FOMO” while we seek external validation for who we think we should be, instead of being comfortable with who we are.

In Entangled Narratives, Lars-Christer Hydén emphasizes the possibilities that are inherent in collaborative storytelling with individuals with dementia. He instructs professionals and other healthy relatives to learn how to effectively listen and, ultimately, re-imagine their patients and loved ones as collaborative meaning-makers in their lives.

**NEW IN PAPERBACK**

**Beyond the Archive**

*Memory, Narrative, and the Autobiographical Process*

Jens Brockmeier, The American University of Paris

This book forces readers to radically rethink the idea of memory as an archive of the past. Examining the notion of remembering in the neurosciences, humanities, social studies, and in key works of autobiographical literature, these far-ranging studies shed new light on the narrative dynamic of remembering, forgetting, and identity.

**NEW IN PAPERBACK**

**Lighter As We Go**

*Virtues, Character Strengths, and Aging*

Mindy Greenstein and Jimmie Holland, both at Memorial Sloan-Kettering Cancer Center

Contrary to common wisdom and the fears of millennia, our sense of well-being actually goes up in older age, even in the presence of illness or disability. Lighter As We Go is the first book to explore how and why that is.

NEW EDITION

**The Oxford Handbook of Personality and Social Psychology**

Second Edition

Edited by Kay Deaux, City University of New York Graduate Center, and Mark Snyder, University of Minnesota

- One of the only Handbooks devoted to building bridges between personality and social psychology
- Addresses the historical, conceptual, methodological, and empirical foundations between personality and social psychology

The second edition of this Handbook uniquely integrates personality and social psychology perspectives together in one volume. This new edition offers readers comprehensive coverage of new and emerging areas of theory, research, and application, and assesses the fields’ growth and development since the publication of the first edition.

**The Oxford Handbook of the Human Essence**

Edited by John F. Dovidio, Yale University, and Martijn van Zomeren, University of Groningen

Advances in social-psychological theorizing and research suggest that humans can be viewed as biological beings as well as cultural creatures, rational reasons as well as emotional enigmas, moral minds as well as amoral agents. Edited by John van Zomeren and John F. Dovidio, The Oxford Handbook of the Human Essence expertly articulates both what social psychology can tell us about the human essence, and the astonishing range of perspectives reflected within this field.

**The Oxford Handbook of Social Psychology and Social Justice**

Edited by Phillip L. Hammack, University of California, Santa Cruz

The Oxford Handbook of Social Psychology and Social Justice spans cultures and disciplines to highlight critical paradigms and practices for the study of social injustice in diverse contexts. This book addresses injustice along such lines as race, ethnicity, gender, sexual identity, and social class. It also addresses pressing issues of globalization, conflict, intervention, and social policy.

**The Oxford Handbook of Integrative Health Science**

Edited by Carol D. Ryff, University of Wisconsin-Madison, and Robert F. Krueger, University of Minnesota

Health is often studied by drilling down into targeted domains, even though growing evidence documents that most illnesses are influenced by a multitude of biological, psychological, and social factors working interactively together. This Handbook showcases innovative new lines of integrative health research that put the pieces together to tell a bigger, more complete story.

SOCIaL  PSYCHOLOGY

Gender, Sex, and Sexualities
Psychological Perspectives
Edited by Nancy Dess, Occidental College, Jeanne Marecek, Swarthmore College, and Leslie Bell, private practice
- Offers a uniquely broad survey of theoretical approaches to the study of gender and sexualities that are of interest to psychologists.
- Contributions reflect emerging issues in the study of gender and sexualities.
- Features a roster of renowned contributors from around the world.

Questions about gender, sex, and sexualities have spurred political, religious, and juridical debates around the world. This book offers readers up-to-date knowledge concerning these matters, as well as tools for critical analysis. Its contributions by leading scholars from around the world will stimulate novel thinking among students and scholars within psychology and related fields.

Supernatural
Death, Meaning, and the Power of the Invisible World
Clay Routledge, North Dakota State University
- Reveals fascinating research pointing to the fact that as people abandon conventional faiths, they become more interested in other supernatural and paranormal ideas.
- Argues against the mainstream belief that people are becoming wholly more rational and scientific.
- While most pollsters argue religiosity is declining, Routledge urges readers to look more broadly at the data on people’s attraction to the supernatural.

Clay Routledge, an experimental social psychologist who grew up in a deeply religious environment, argues that belief or trust in forces beyond our understanding is natural and rooted in our fears of death. In Supernatural: Death, Meaning, and the Power of the Invisible World, Routledge argues that supernatural thinking isadaptive, even healthy, and that it should unite and not divide us.

NEW EDITION
Going Broke
Why Americans (Still) Can’t Hold On To Their Money
SECOND EDITION
Stuart Vyse,
Connecticut College
First published in 2008, Stuart Vyse’s Going Broke describes the epidemic of personal debt that existed in the years leading up to the Great Recession, and anticipated the home mortgage crisis that started it. Ten years later, a fully-updated new edition tackles the post-recession era of economic recovery.

Strength Through Peace
How Demilitarization Led to Peace and Happiness in Costa Rica, and What the Rest of the World can Learn From a Tiny, Tropical Nation
Judith Eve Lipton and David P. Barash, Professor Emeritus, University of Washington
Costa Rica is the only fully demilitarized, completely independent country in the world. Through good luck, good leadership, and good decisions, Costa Rica has become arguably the sanest and most progressive country on earth. This book examines how and why Costa Rica is safe and independent without any military at all, and what the rest of us can learn from its success.

Of Mind and Murder
Toward a More Comprehensive Psychology of the Holocaust
George R. Mastroianni, US Air Force Academy
Of Mind and Murder traces the history of psychological attempts to understand the Holocaust and critically assesses the existing literature. As the dominance of the situationist interpretation of the psychology of the Holocaust popularized by Milgram wanes, Of Mind and Murder suggests some possible paths forward to a new psychology of the Holocaust.

A Scientific Search for Altruism
Do We Only Care About Ourselves?
C. Daniel Batson, University of Kansas

This book traces the scientific search for altruism through numerous studies and attempts to examine various motivational suspects, reaching the improbable conclusion that empathy-induced altruism is indeed part of our nature. The book then considers the implications of this conclusion both for our understanding of who we are as humans (the bad news as well as the good) and how we might create a more humane society.

The Creativity Reader
Edited by Vlad Petre Glaveanu, University of York

The Creativity Reader brings together a prestigious group of international experts who were tasked with choosing, introducing, and commenting on seminal texts focused on creativity, invention, genius, and imagination from the period of 1850 to 1950. This volume is at once retrospective and prospective: it revisits old ideas, assesses their importance today, and explores their potential for the future.

The Marvel of Martyrdom
The Power of Self-Sacrifice in a Selfish World
Sophia Moskalenko, University of Maryland, and Clark McCauley, Bryn Mawr College

The Marvel of Martyrdom starts large — with famous and influential martyrs such as Jesus and Gandhi — and ends small — with ordinary people whose own experiences of self-sacrifice give martyrdom its political power. Seeking the everyday rewards of self-sacrifice, the book shows the potential for finding meaning and happiness in helping others.

The Three Pillars of Radicalization
Needs, Narratives, and Networks
Arie W. Kruglanski, University of Maryland, Jocelyn J. Bélanger, New York University in Abu Dhabi, and Rohan Gunaratna, Nanyang Technological University

Arie W. Kruglanski, Jocelyn J. Bélanger, and Rohan Gunaratna present a new model of radicalization that takes into account factors that activate the individual’s quest for significance. Synthesizing varied empirical evidence, this volume reinterprets prior theories of radicalization and examines major issues in deradicalization and recidivism, which will only become more relevant as communities continue to negotiate the threat of extremism.

Statistics in Context
Barbara Blatchley
Agnes Scott College
Statistics in Context offers a fresh approach to teaching statistics. Designed to reduce students' fear of numbers, the text aims to put statistics-wary readers at ease with uncomplicated explanations and practical examples drawn from real research and everyday life. Written in lively, accessible prose, the narrative describes the who, what, when, where, and why, and also the how, of statistics.

For the latest insight into Psychology and beyond, visit blog.oup.com
Music Therapy Perspectives
Music Therapy Perspectives, an official publication of the American Music Therapy Association, is for readers inside and outside the profession of music therapy. Music Therapy Perspectives seeks to promote the development of music therapy clinical practice through the dissemination of scholarly work. Focusing on clinical benefits of music therapy, the journal strives to serve as a resource and forum for music therapists, music therapy students and educators, and those in related professions.

Journal of Music Therapy
Journal of Music Therapy, an official publication of the American Music Therapy Association, is a forum for authoritative articles of current music therapy research and theory, including book reviews and guest editorials. Its mission is to promote scholarly activity in music therapy and to foster the development and understanding of music therapy and music-based interventions. The journal strives to present a variety of research approaches and topics, to promote critical inquiry, and to serve as a resource and forum for researchers, educators, and clinicians in music therapy and related professions.

Archives of Clinical Neuropsychology
Archives of Clinical Neuropsychology, the official journal of the National Academy of Neuropsychology, publishes original contributions dealing with psychological aspects of the etiology, diagnosis, and treatment of disorders arising out of dysfunction of the central nervous system.

Journal of Pediatric Psychology
The Journal of Pediatric Psychology is the scientific publication of the Society of Pediatric Psychology (SPP), Division 54 of the American Psychological Association. The journal publishes articles related to theory, research, and professional practice in pediatric psychology.

Schizophrenia Bulletin
Schizophrenia Bulletin seeks to review recent developments and empirically based hypotheses regarding the etiology and treatment of schizophrenia. We view the field as broad and deep, and will publish new knowledge ranging from the molecular basis to social and cultural factors.

Social Work
Social Work is the premier journal of the social work profession. Widely read by practitioners, faculty, and students, it is the official journal of National Association of Social Work and is provided to all members as a membership benefit. Social Work is dedicated to improving practice and advancing knowledge in social work and social welfare.

Social Work Research
Social Work Research publishes exemplary research to advance the development of knowledge and inform social work practice. The journal includes analytic reviews of research, theoretical articles pertaining to social work research, evaluation studies, and diverse research studies that contribute to knowledge about social work issues and problems.

Health & Social Work
For 20 years, human services professionals have relied on Health & Social Work for the latest advances in areas such as aging, clinical work, long-term care, oncology, substance abuse, depression, and maternal health. Articles also cover research, policy, specialized services, quality assurance, in-service training, and other topics that affect the delivery of health care services.

Children & Schools
Children & Schools publishes professional materials relevant to social work services for children. The journal publishes articles on innovations in practice, interdisciplinary efforts, research, program evaluation, policy, and planning. Topics include student-authority relationships, multiculturalism, early intervention, needs assessment, violence, and ADHD. Children & Schools is a practitioner-to-practitioner resource.
