Masters of the language of learning

oxfordprimary.com
Every learner.  
Every lesson taught in English.  
Everywhere.

Around the world, the Oxford International Primary programme provides the best and most comprehensive support available for schools where subjects are taught in English.

Our focus is on helping children learn how to learn, by asking the right questions. Developed by leading educational experts, all our books, resources and support for teachers are based on this proven methodology – and accompanied by the fullest language support to ensure the genuine understanding essential for successful learning.
The needs of schools across the world may vary considerably, but whatever the specific challenges or needs you may be facing, we’re here to provide expert help.

Across all subjects, and throughout the primary age range, the Oxford International Primary programme is the best and most comprehensive offering for schools that teach in English.

Our full range includes:
- Maths
- Science
- Computing
- Geography
- History
- Social Studies
- An English option to suit your school’s needs

At the heart of successful learning, in any language: asking the right questions.

Children are naturally curious, so our methodology is based on nurturing enquiring young minds; helping your students learn how to learn, by asking the right questions.

‘The children loved it! Thoroughly enjoyed it! They had fun with the hands-on activities and enjoyed the cooperative learning’
Teacher at Al Noor International School, Bahrain
This six-step approach shows how enquiry-based learning can work in a classroom.*

**Ask**
Students start by asking questions, talking about problems, and discussing ideas. This stage is all about tapping into students’ curiosity.

**Investigate**
Students start to investigate and explore ideas. This may include finding and studying resources, conducting research, surveying, talking to people, and carrying out field work.

**Evaluate and Reflect**
Students consider what has been learned and how reliable their findings are. They reflect on the whole process and whether it could be improved, or whether methods could be modified.

**Record**
Students organise findings and collate ideas. They may create tables and charts, classify information, and draw or photograph.

**Interpret**
Students think about whether their findings answer their initial questions. Does the data support predictions and hypotheses? What new questions come up?

**Discuss and Report**
Students discuss their findings and conclusions. What do others think? They also think about how their ideas can be reported and shared.

**Ask**
Students start by asking questions, talking about problems, and discussing ideas. This stage is all about tapping into students’ curiosity.

*Students may not need to follow the cycle in sequence every time*
Teaching well can be hard enough without the barrier of language. Drawing on Oxford’s unrivalled expertise in English language teaching, we provide the comprehensive support needed to ensure genuine understanding and successful learning.

Written with EAL learners in mind, our books and resources contain embedded language support and comprehensive scaffolding tools, allowing you to tailor our programme to the needs of all ability levels.

For language support, at every level, we’re in a class of our own.
We believe that teachers do the world’s most important job. And we aim to provide everything you need to do it to the best of your ability – not just teaching materials and resources, but also full service professional development.

Our Teacher Guides provide step-by-step notes for each lesson, as well as differentiation support, assessment tips, and guidance for non-specialist teachers.

We also offer tailored professional development of outstanding quality – delivered through a variety of channels to suit you, from e-learning modules and webinars to full service workshops delivered by one of our experts.

We believe that teachers do the world’s most important job. And we aim to provide everything you need to do it to the best of your ability – not just teaching materials and resources, but also full service professional development.

‘The teaching really has been improved! I had to spend less time planning lessons.’
Teacher at Al Noor International School, Bahrain
Across the Oxford International Primary programme, all our books, resources, and materials are based on world-class educational expertise, and tested in schools internationally to ensure they promote the highest possible attainment levels.

In addition, we provide rich assessment resources for all subjects that allow you to track progress and report on attainment, and encourage your students to reflect on their development and take control of their own learning.
Any school, anywhere

Wherever children learn in English, Oxford is there for you.

We’ve designed the Oxford International Primary programme for maximum flexibility, to meet the needs of every type of school where primary subjects are taught in English.

‘Barão Bilingue is always seeking quality education and we found the Oxford International Primary Programme a great ally for the acquisition and learning of content from other areas of knowledge... the books from this collection are the key to make the learning process happen effectively.’

Teacher at Escola Barão, Blumenau, Brazil

Whether you are just beginning your journey teaching with English-medium instruction, or are an established international school, we’re ready and waiting to discuss how we can help you achieve your goals.
Our resources

You can use the programme alongside various English options, depending on your school’s needs:

- **Oxford English for Cambridge Primary**: an integrated skills course written to support the Cambridge Primary English curriculum framework
- **Oxford International English**: a reading anthology-based course, combining fiction and non-fiction
- **Oxford Discover**: a progressive ELT course that builds 21st century skills
- **Family and Friends**: a traditional ELT course, with exceptional skills training and a step-by-step approach to phonics

Contact your local representative to discuss which course will best suit your needs.

We also offer online resources and support, available on Oxford Owl
