Level 3 Parent’s Guide

Introduction

This year your child will learn English using Learn English with Dora the Explorer™. You have an important role in your child’s English education. You can help your child be successful in English, regardless of your own level of English. Oxford University Press (OUP) has partnered with Viacom Nickelodeon Consumer Products to create a compelling English Language Teaching program for young students that can be used at school or at home. Nickelodeon’s characters have educated and entertained children for decades, using storytelling techniques which are designed to improve children’s critical-thinking abilities. This, combined with OUP’s trusted teaching methodology and valued relationships with Primary teachers around the world, means that your child will have fun in their English classes while also making progress.

Welcome to the world of Learn English with Dora the Explorer!

With Dora, every English class is an adventure. On this adventure, your child will learn lots of English words and useful phrases. The course is unique in that it features the beloved characters from the Nickelodeon television series Dora the Explorer. Dora and Boots the monkey inspire students to enjoy learning English and to care about the world around them through a positive, “can-do” outlook on life and community values.

Language learning goes beyond what happens in the classroom. Even if you don’t speak much English, your support and encouragement are extremely valuable. This Parent’s Guide has been specifically designed to provide you with practical tips and suggestions, so that you can enjoy being involved in your child’s learning. The Parent’s Guide provides notes for each pair of lessons in every unit. These notes begin with a summary of what your child has been learning in each lesson. It is here that you will see the key vocabulary and language that your child has been practicing in class. Two Home Study Activities are then provided for you and your child to do together. These activities will enable you to help your child practice the key vocabulary and language, often allowing your child to personalize what they have learnt and transfer their knowledge to the context of their own family and home setting. The sequence and staging of these activities mirror the way the children learn in class – first by listening and responding, then by listening and repeating, then by speaking.

Learning a language isn’t just about learning words, of course —it’s also about understanding and respecting other people and relating to them in a positive way. In each of the animations your child watches in class, they will see Dora and her friends exhibiting positive values (e.g. helping friends, sharing and being safe) and this is supported with follow-up activities to develop your child’s emotional understanding. For this reason,
the Parent’s Guide also enlists your help in reaffirming the values your child has been learning. Guidance for doing this is detailed in the notes for Lessons 5–6 in every unit. In addition to the Home Study Activities, further Extra Practice activities are also provided. These will allow you to make the most of the course materials which are available to you for home use, namely your child’s Student’s Book and Activity Book, the Storyteller Vocabulary Presentation video for each unit and the course songs. The activity suggestions in this section will not only provide you with ideas for using the materials in a different way to the way they have been used in class, but also give you an opportunity to talk to your child about what they’re learning in their English lessons and see the hard work they have been doing. The notes for each pair of lessons end with a progress check, which enables you to monitor how well your child is doing, as well as give praise and encouragement to your child.

Tips for Using English Together With Your Child

• Don’t worry if you don’t speak much English. You can still be a lot of help in your own language, especially when first starting out. Seeing you use the English that you know will inspire your child to speak English, too!
• Make the most of the available course materials for support with your own English. The story audio transcripts are provided and you may find that the Storyteller Vocabulary Presentation video for each unit is a useful learning aid for you too. In addition, both the video and the songs can provide a useful model for the pronunciation of new language.
• Encourage and praise your child. Use the progress sections in the Parent’s Guide notes to celebrate your child’s effort and achievements. You can write a message for your child, e.g. Good job! That was great! You worked hard! Good try! – Let’s do it again. I’m proud of you! You can also draw a picture for your child, e.g. a smiley face, a star, clapping hands or a trophy.
• Don’t be afraid to make mistakes, and to laugh at your own mistakes.
• Let your child make mistakes, too. Your child will learn from your example and have more fun learning the language.
• Practice English with games that involve movement and mime. Use real objects, such as your child’s toys, and photos to make practice more relevant to your child.
• Feel free to use your own language to talk to your child about some aspects of their learning. Conversations about values, as well as the way your child approached activities in their Student’s Book or Activity Book, are also of wider educational benefit, such as emotional development and critical-thinking skills.
• When you have completed an activity or unit you may want to sing the Listening 22 We Did It! chant with your child.
• Create opportunities for your child to see people using English.

Learning a language is something which takes time and patience, but the best way to help your child become excited about learning is to show that you are excited, too.
