Get crafty with

THE

WOOLLIES

Finger-knit a flower!

Instructions:

1. Tie a simple slipknot into the end of the wool and slide it onto your forefinger. (If you are right handed, use your left forefinger.) Wiggle the knot to about where your first knuckle joint is.

2. Loop the wool over your forefinger, next to and on the fingertip side of the slipknot.

3. Take the first loop (the slipknot loop at this stage) and pull it over the second loop and off your forefinger so that only one loop remains on your finger.

4. Pull the tail so that the stitch tightens. Repeat these steps until you have a long finger-knitted rope.

5. Spiral the rope into a flower shape

6. Secure it with a few stitches, fix it onto a twig and find a vase for your knitted flower!

You will need:
- A ball of rainbow wool
- A twig
- A leaf cut of green paper
