It’s as easy as ABC

Alphabetical order is easy when words start with different letters.
If the first letter of the word is the same, go to the second letter: photo comes before pied because h comes before i.
If the first two letters are the same, go to the third letter: seize comes before sept because i comes before p, and so on.
Join the dots in alphabetical order. What do you see?

How did you do? Colour the right face for you.

😊 = I can do this easily 😐 = I can do some of this 😞 = I need more practice
