Putting things in order: Challenge 2

In dictionaries, words are put in alphabetical order. You put words in alphabetical order by their first letters. If you can’t remember the order of the alphabet, there is a reminder down the side of each page.

1. Write these words in alphabetical order.

   s  m  l  c  z  h

   1 ..................................................  2 ..................................................  3 ..................................................

   4 ..................................................  5 ..................................................  6 ..................................................

2. Number these actions in alphabetical order. Now do them in alphabetical order.

   point  nod
   wave  smile
   yawn  laugh

Not sure if you got it right?
Check your answer using an Oxford Children’s Dictionary.
