Making the most of meanings: Challenge 3

When you look up a word in a dictionary, you will find useful information to help you understand what that word means.

You often also find extra information to help you understand how things work, or why they are important, interesting, or special. For example, if you look up wheat you will see that it is used to make flour.

Find the underlined word in the Oxford First Dictionary and read the meaning or definition carefully. Then find the answers to the following questions in the definitions.

1. What are fish covered with?
2. What is the job of a nurse?
3. How long does it take the moon to move around the earth?
4. Where are tigers found?
5. What is ice cream made from?
6. What can you use to play a drum?
7. Which part of a tree do branches grow out from?
8. Where do snails live?
9. What are penguins good at?
10. What do x-rays show you?
