Your 5-year Geography curriculum for AQA

- Coherent curriculum resources
- Complete assessment support
- Designed for AQA

www.oxfordsecondary.co.uk/geography
Build a 5-year, AQA Geography curriculum with Oxford

Build a seamless curriculum across five years by combining our KS3 Geography course with GCSE 9-1 Geography AQA

- Kerboodle resources and assessment are familiar and coherent across the 5 years
- Student Books and Teacher Handbooks, developed by series editor Simon Ross, have consistent styles across both key stages, with similar strategies built in
- Students can use the resources to develop knowledge and key skills coherently as they progress through secondary school
- All resources are tailored for the AQA specification, enabling you to focus on teaching, knowing that you’ve got the spec covered
We don’t believe in teaching to the test...

... so we’ve built in exam skills support that allows you to concentrate on delivering a great curriculum

- Build familiarity with command words from Year 7 with walkthroughs on Kerboodle and practice questions using command language
- Plenty of support available so that your students can develop the geographical skills needed to succeed in the GCSE exams, as well as maths skills and geographical literacy
- Comprehensive assessment packages available on Kerboodle, so that your students are confident with any type of question
- An engaging Geography curriculum to get your students excited about learning and applying the skills they develop
A knowledge-rich curriculum that also delivers on skills

**Designed to ensure all students master the key concepts**

- Motivating and engaging approach with topical, relevant content which sparks a passion for geography, right from their first days at secondary school

- Resources help to create the building blocks that students need to have a broad knowledge of the world, whether finishing their studies at KS3 or continuing to GCSE

- Support for embedding a deep understanding of geographical skills is integrated throughout the five years, with dedicated skills activities and spreads throughout the Student Books

- Skills-pods on Kerboodles for both key stages allow you to coherently support students’ understanding and application of key geographical skills, including mathematical skills

A comprehensive assessment package to underpin your curriculum...

... helping you to keep track of students’ knowledge and understanding

- A consistent assessment journey over 5 years
- Kerboodle provides formative and summative tests, including exam-style assessment papers, so that you can monitor your students’ progression throughout secondary school.
- Exam-style questions and papers provided throughout the course give your students as much practice as possible
- Reporting structures allow you to monitor a student’s achievement in whichever way is most appropriate for your school, whether you choose to use performance terms (beginning, securing, extending) or GCSE grade indicators
Built-in support to help develop a rich geographical vocabulary...

... to ensure that every child is able to confidently communicate their ideas

- Accessible language to help your students to easily get to grips with geographical concepts
- 'Key terms' lists in Student Books help to build geographical literacy
- Glossaries and glossary worksheets are available to help you challenge your students to find definitions and uses of key geographical terms
- Our teacher handbooks give you easy access to vocabulary lists which you can introduce throughout your lessons
Locational knowledge and understanding

... to make sure your students have a good understanding of the world around them

- Detailed case studies to help create an in-depth understanding of place
- High-quality photos, maps and diagrams help bring the geography of different places to life
- Fieldwork skills activities at KS3, along with a dedicated book for fieldwork at GCSE, ensure that students build the expertise to analyse environments and confidently discuss their results
Tick the resources you’d like to order below. Print resources are available free on inspection for 30 days, we’ll contact you to set up any Kerboodle subscriptions you’d like to order.
