The attainment target for the new Programme of Study for geography is as follows:

By the end of Key Stage 3, pupils are expected to know, apply and understand the matters, skills and processes specified in the Programme of Study.

There's a link to the complete Programme of Study here.

The government has said:

The new programmes of study set out what should be taught by the end of each key stage. We will give schools the freedom to develop a curriculum which is relevant to their pupils and enables them to meet these expectations.

Schools will be able to introduce their own approaches to formative assessment, to support pupil attainment and progression.

The assessment framework should be built into the school curriculum, so that schools can check what pupils have learned and whether they are on track to meet expectations at the end of the key stage, and so that they can report regularly to parents.

Ofsted's inspections will be informed by whatever pupil tracking data schools choose to keep.

How does this apply to geography?

The attainment target for the new Programme of Study for geography is as follows:

By the end of Key Stage 3, pupils are expected to know, apply and understand the matters, skills and processes specified in the Programme of Study.
