NEW
GCSE 9-1 geography
OCR B

Dynamic and student-friendly resources for the 2016 specification
Take a dynamic and student-friendly approach to the new specification

Keep all your students enthused and motivated as you work through the 2016 OCR GCSE Geography B specification. From a team led by experienced author John Widdowson, these resources combine rigorous coverage of the content and skills students require to succeed in the assessment with an accessible and engaging approach.

- Brand new resources tailored to the 9–1 specification, with support for skills and fieldwork integrated throughout
- Clear page design and accessible language which will appeal to all your students
- Kerboodle provides Schemes of Work, homework materials, a comprehensive assessment package, a digital Student Book, and a digital Teacher Handbook

Meet the team

John Widdowson has written several textbooks for KS3 and GCSE, including the Oxford books for the legacy OCR A and OCR B specs. He’s spent his teaching career in east London, where he now runs an urban fieldwork project.

Andy Crampton has worked as a lecturer in human geography at Nottingham Trent University and is currently Head of Geography at King Edward VI Handsworth School in Birmingham.

Catherine Owen is a Chartered Geographer and GA consultant. She’s the Head of Geography at The King Alfred School in Somerset.

Evaluation

The Evaluation Pack for this course is free for 30 days and contains a copy of the Student Book and information about the supporting Kerboodle resources, including sample teacher material. To order yours, please return the tear-off form at the back of this brochure.

Wealth: GNI/capita is only an average measure of wealth. Many peopleCentre for the study of human variation in China. The text has been carefully written to ensure it's at the right level.
Support for GCSE Geography OCR B is provided online through a Kerboodle Resources and Assessment package. Resources include:

- Schemes of Work for every topic to support teaching of the new specification
- Activities and support to help students learn and remember the key geographical terminology required by the specification
- Animations and support to help students develop the key geographical skills required by the specification

Your Teacher Handbook is included with your Kerboodle Resources and Assessment subscription, so your whole department can access it easily, anywhere, at any time.

The Kerboodle Student Book is an online version of the Student Book. Teacher access is included with your Kerboodle Resources and Assessment subscription. You can also choose to purchase student access to the Kerboodle Student Book.

To find out more, please turn to page 10.
Assessment

Kerboodle's comprehensive support for exam preparation covers the range of question types your students will face in their exams through three types of activity.

It includes:
- Interactive and downloadable paper-based assessments
- Auto-marked and teacher-marked assessments, plus opportunities for self- or peer-marking
- The Kerboodle Markbook to record and present student results
- Student-friendly mark schemes
- A range of support materials and feedback

1. Test yourself

There are over 20 of these interactive, multiple-choice tests, which are ideal practice for the 1-2 mark exam questions.

- Tests are auto-marked to save you time
- Students are provided with formative feedback to enhance their understanding
- Great for homework

2. Exam-practice questions

Kerboodle provides more than 150 exam-practice questions, ideal preparation for open-response exam questions.

- Each question is accompanied by an interactive, front-of-class presentation, which you can use to help students 'unpick' the question
- 'Max your marks' tips help students to write strong answers
- Student-friendly mark schemes are provided – perfect for self- or peer-assessment

3. On your marks

There's an exam-style question for every topic, providing ideal practice for the extended writing questions.

- Each question is accompanied by extensive, flexible support materials to help you develop students' exam skills
- Includes student-friendly mark schemes, ideal for peer- or self-assessment
- Sample answers at different levels, with assessor's comments and advice, help students to see how they can improve

Sample Test Yourself screen

Sample On your marks screen

These tests make a great homework task that is easy to assign and auto-marked

Includes time-saving front-of-class presentations to help you brief your students on what's required of them
The GCSE Geography OCR B specification includes some content not covered in previous specifications, for example the increased emphasis on the geography of the UK.

The course provides comprehensive coverage of the specification.

All students will now sit the same papers. The Student Book’s accessible approach appeals to students of all abilities and differentiated resources on Kerboodle help your whole class to tackle each topic.

Lots of extended practical ideas for fieldwork are provided (for both physical and human geography), helping students to understand each stage of the enquiry process in a fieldwork context. Fieldwork skills are integrated throughout the book.

Skills, including mathematical and statistical skills, account for 10% of total marks. Skills are integrated throughout the book, just as the specification requires and mirroring the way skills are assessed in the examinations. Skills are woven into the activities for the eight topics students study, helping them to ‘think geographically’.

GeoActive provides you with new case studies each term, as well as access to an easily searchable archive of past case studies. The case studies are accessed via Kerboodle and are downloadable and printable.

- Case studies explore a broad range of themes and are supported by student activities
- Links to GCSE specifications, including OCR B, are highlighted
- New issues now include an extension version of each case study to help with differentiation and progression

If you would like to subscribe to GeoActive, please speak to your local Educational Consultant or email schools.orders.uk@oup.com.
