This manual contains all answers and solutions of the end-of-chapter problems in

The website contains solutions of over 3000 end-of-chapter problems, including 273 figures. The solutions are grouped by the chapters, listed below, within the seven parts of the book: each part is self-contained on the website. The authors would be grateful for any corrections, and for any comments which might improve the problems and their solutions. The solutions can be freely used or downloaded from this website but the authors would be grateful for acknowledgement where substantial use is made of the material.

**Part I: Elementary methods, differentiation, complex numbers**

- Chapter 1: Standard functions and techniques
- Chapter 2: Differentiation
- Chapter 3: Further techniques for differentiation
- Chapter 4: Applications of Differentiation
- Chapter 5: Taylor Series and approximations
- Chapter 6: Complex numbers

**Part II: Matrix and vector algebra**

- Chapter 7: Matrix algebra
- Chapter 8: Determinants
- Chapter 9: Elementary operations with vectors
- Chapter 10: The scalar product
- Chapter 11: Vector product
- Chapter 12: Linear algebraic equations
- Chapter 13: Eigenvalues and eigenvectors

**Part III: Integration and differential equations**

- Chapter 14: Antidifferentiation and area
- Chapter 15: The definite and indefinite integral
- Chapter 16: Applications involving the integral as a sum
- Chapter 17: Systematic techniques for integration
- Chapter 18: Unforced linear differential equations with constant coefficients
- Chapter 19: Forced linear differential equations
- Chapter 20: Harmonic functions and the harmonic oscillator
- Chapter 21: Steady forced oscillations: phasors, impedance, transfer functions
- Chapter 22: Graphical, numerical, and other aspects of first-order equations
- Chapter 23: Nonlinear differential equations and the phase plane

**Part IV: Transforms and Fourier series**

- Chapter 24: The Laplace transform
- Chapter 25: Laplace and $z$ transforms: applications
Chapter 26: Fourier series
Chapter 27: Fourier transforms

Part V: Multivariable calculus

Chapter 28: Differentiation of functions of two variables
Chapter 29: Functions of two variables: geometry and formulae
Chapter 30: Chain rules, restricted maxima, coordinate systems
Chapter 31: Functions of any number of variables
Chapter 32: Double integration
Chapter 33: Line integrals
Chapter 34: Vector fields: divergence and curl

Part VI: Discrete mathematics

Chapter 35: Sets
Chapter 36: Boolean algebra: logic gates and switching functions
Chapter 37: Graph theory and its applications
Chapter 38: Difference equations

Part VII: Probability and statistics

Chapter 39: Probability
Chapter 40: Random variables and probability distributions
Chapter 41: Descriptive statistics
