KS3 Working Scientifically pack

This pack contains a selection of resources taken from the Activate series which help KS3 students to continue their science learning during this time away from the classroom.

- Start by working through the Student Book chapter on working scientifically. The chapter is accompanied by two worksheets.
- Build research and literacy skills with the Webquests. There’s a whole range of topics to choose from.
- Use the Checkpoint revision worksheets to consolidate and practise prior learning.
- Those confident with the topic can take their learning further using the Checkpoint extension worksheets.
